

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

Transfer No. 83380

RECEIVED
MAY 22 2019

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

Department of Water Resources

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at idwr.idaho.gov.

Name of Applicant(s) The Spetzler Family Trust

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

Yes N/A * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). **
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at idwr.idaho.gov/water-rights/transfers/resources.html.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
- ☐ ☐ #10 Other. Please describe: _____

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 1

Name of Applicant(s) The Spetzler Family Trust Phone 602-549-1032
Mailing address 6107 N Palo Cristi Rd, Paradise Valley, AZ 85253-3747 Email Nspetzler@gmail.com

- ☐ If applicant is not an individual and not registered to do business in the State of Idaho, attach documentation identifying officers authorized to sign or act on behalf of the applicant. Label it **Attachment #1**.
- ☐ Attach water right ownership documentation if Department records do not show the transfer applicant as the current water right owner. Label it **Attachment #2a**.
- ☐ If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). Label it **Attachment #2b**.
- ☐ Attach documentation of authority to make the proposed change if the applicant is not the water right owner. Label it **Attachment #3**.

Provide contact information below if a consultant, attorney, or any other person is representing the applicant in this transfer process.

☐ No Representative

Name of Representative Rocky Mountain Environmental Associates, Inc. Phone 208-524-2353
Mailing address 482 Constitution Way Ste 303, Idaho Falls, ID 83402 Email kristin.rmea@gmail.com

- ☐ Send all correspondence for this application to the representative and not to the applicant.
OR
- ☒ Send original correspondence to the applicant and copies to the representative.
- ☒ The representative may submit information for the applicant but is not authorized to sign for the applicant.
OR
- ☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant and label it **Attachment #4**.

I hereby assert that no one will be injured by the proposed changes and that the proposed changes do not constitute an enlargement in use of the original right(s). The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Signature of Applicant or Authorized Representative

Signature of Applicant or Authorized Representative

Robert F. Spetzler, Trustee 05/17/2019
Print Name and Title if applicable Date

Nancy B. Spetzler, Trustee 05/17/2019
Print Name and Title if applicable Date

A. PURPOSE OF TRANSFER

- ☒ Change point of diversion ☐ Add diversion point(s) ☐ Change place of use
☒ Change nature of use ☒ Change period of use ☐ Other _____
- Is this a transfer for changes pursuant to Idaho Code § 42-221.0.8?
If yes, ☐ attach an explanation and any supporting documentation labeled as **Part 1A.2**.
- Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.3**.
See attached narrative Part 1A.3. This application also proposes to correct a point of diversion to reflect the actual location of the irrigation ditch. No physical change of the point of diversion is proposed.

Narrative to Support Applications*The Spetzler Family Trust*

Application for Permit

Application for Transfer of Water Right 22-4157

Application for Transfer of a Portion of Water Right 22-14026

The Spetzler Family Trust owns property located in Sections 21 and 22, T4N R45E, northwest of Victor, Idaho about 1 ¼ miles east of the Teton River. The property currently has water rights for stockwater and irrigation. The irrigation water right 22-4157 is for diversion of water from an Unnamed Stream and Elliot Creek for the irrigation of 49 acres. Applicant has also contracted to purchase 5.0 acres of ground water right 22-14026.

Two ponds are proposed to be developed. Pond surface area is designed to be 0.7 ac for the east pond and 2.0 ac for the west pond, for a total surface area of 2.7 ac. The ponds will be relatively shallow, resulting in a storage volume of 7.0 acre-feet total. The water right components will be provided through a combination of water rights applications as described in this narrative. This narrative will also serve to supply information necessary to satisfy Attachment #8a of the transfer applications.

Application for Permit

This application proposes to obtain authorization only for the impoundment of 7.0 af of water. No consumption of water is proposed under this water right. It is anticipated that the ponds will fill naturally from ground water due to the locally high water table. Intermountain aquatics performed ground water monitoring in 2018. Their results show that at the location of the east pond, ground water levels are at land surface year round. At the west pond location, ground water drops to within 1.7 feet below land surface. The west pond will be designed to accommodate the fluctuating water table.

The first time fill of the ponds will require 7.0 af of volume. Although the ponds will fill naturally from ground water, the volume will be mitigated by temporary non-use of 7.0 af of the transferred portion of water right 22-14026. The exact amount of acres required for non-use is determined based on the historical consumptive use of "alfalfa-less frequent cuttings," the historical crop irrigated by water right 22-14206. ET Idaho 2017 (Allen and Robison 2017), using the Driggs (NWS -- USC00102676) station, shows that alfalfa-less frequent cuttings has a net irrigation requirement of 617 mm/yr, or 2.02 ft/yr. (A copy of all ET Idaho 2017 values used in this report are included in Figure 1.) To obtain 7 af for pond fill, it would require non-use of 3.5 acres for one year.

$$7 \text{ af} / 2.02 \text{ ft/yr} = 3.5 \text{ acres}$$

The pond will be filled through a 1-year rental of 3.5 acres of ground water rights from the Water Supply Bank. The application to rent water will be submitted when a schedule is determined for excavation.

Application for Transfer of Water Right 22-4157

For the purposes of maintenance, both for evaporation and to assist with keeping the pond water fresh, it is proposed to convert a portion of water right 22-4157 to storage. Using IDWR's Pond Loss Calculation spreadsheet, evaporation was calculated to be 4.3 afa from the 2.7 acre ponds.

$$483.29 \text{ mm/yr} / 304.8 \times 2.7 \text{ ac} = 4.3 \text{ afa}$$

This value is based upon the precipitation deficit of Open Water – Shallow Systems, Driggs (NWS-USC00102676), from ET Idaho 2017, with removal of negative values. Figure 2 includes a copy of the Evaporation Loss Calculations from the IDWR Pond Loss Calculation spreadsheet.

Current land cover at the location of the ponds appears to fall within the description of Grass Hay. According to ET Idaho 2017, using the Driggs (NWS-USC00102676) station, Grass Hay has a net irrigation requirement of 612 mm/year, or 2.01 ft/year. It will require 2.1 acres of grass hay to provide the necessary volume of 4.3 afa as determined in the following calculation:

$$4.3 \text{ afa} / 2.01 \text{ ft/yr} = 2.1 \text{ ac}$$

The final footprint of the ponds will overlap the water right place of use by 2.4 acres. Although the ponds are only calculated to require 2.1 acres of water right, it is proposed to retire all 2.4 acres to provide additional flow.

Application for Transfer of Water Right 22-14206

Water right 22-4157, the existing surface water right, has a priority date of May 25, 1916. Under administration, this right will not be available during the peak of the irrigation season when temperatures rise. Therefore, additional water rights will be needed to provide adequate maintenance for the ponds. Applicant is contracted to purchase 5.0 acres of water right 22-14206, a primary ground water right. The contracted portion of this water right is proposed to be transferred to the applicant's property for the purposes of irrigation and pond maintenance.

To be conservative, the full evaporation of the ponds described in the previous section is considered for conversion of the ground water right. Consumptive use requirements are 4.3 afa. Historical irrigation under 22-14026, described above, indicates a consumptive use value of 2.02 ft/yr. A total of 2.1 acres are required to provide the necessary volume to maintain the pond.

$$4.3 \text{ af} / 2.02 \text{ ft/yr} = 2.1 \text{ acres}$$

The remaining purchased acres will be used for irrigation of 2.9 acres on the property, within a larger Permissible Place of Use, as identified in Attachment #7a of the transfer application.

Summary

The proposed ponds will have a total surface area of 2.7 acres and a volume of 7 af. The storage component of the ponds is proposed to be provided through an Application for Permit for a new water right. First time fill of 7 af is proposed to be provided through a Water Supply Bank rental of 3.5 acres. Maintenance of the ponds will be provided through two water rights: existing surface right 22-4157 and the purchased ground water right 22-14026. In effect, there will be redundant water rights for maintenance of the ponds, helping to provide sufficient water for evaporation and water for pond refresh, when available. Excess water will spill from the pond into a pond outlet that will flow to the creek.

User Input
Calculated value
Formula Explanations

The acronyms used on the Kimberly Research Center website are defined below:

P = Precipitation
ET= Evapotranspiration
P _d = Precipitation deficit
P _d =ET-P

USING THIS SPREADSHEET

Use the link below to access the Kimberly Research Center website. This website provides the Precipitation Deficit for a station most representative of the pond under examination. The Precipitation Deficit is the total amount of free water surface evaporation minus the precipitation for a given area, which gives the total amount of evaporative losses incurred by the pond. There are several weather sites that are used throughout the state. IDWR staff can find the nearest site using Arc Map. The shape file containing the sites can be found at X:/Spatial/Climate/ETIdahostations.shp.

Instructions:

1. Use the link below to navigate to ET Idaho 2012.
2. Select the station which is most representative to your pond location.
3. Click Submit Query.
4. Under "Land Covers with Evapotranspiration Estimates," select "Open Water - Shallow Systems (ponds, streams)" or "Open Water - small stock ponds" depending on the pond size.
5. Click the link to "Precipitation Deficit."
6. Reference and copy (ctrl + C) the first subheading "Mean" values.
7. Click the "Paste Values from ET Idaho" button. The table will automatically enter a zero (0) for any negative precipitation deficit values.

Found at: <http://data.kimberly.uidaho.edu/ETIdaho/>

Precipitation Deficit

Station: Driggs (NWS -- 102676)

Month	mm/day ¹	Days per month	mm/Month
Jan	-0.58	31	0.00
Feb	-0.06	28	0.00
March	0.48	31	14.88
April	1.27	30	38.10
May	1.70	31	52.70
June	3.19	30	95.70
July	3.30	31	102.30
August	3.10	31	96.10
September	2.05	30	61.50
October	0.71	31	22.01
November	-0.29	30	0.00
December	-0.76	31	0.00

Total mm/year = 483.29

PLEASE NOTE: The seasonal average for precipitation deficit should not be used for calculations because precipitation often exceeds evaporation during wetter months of the year. If the pond is kept full, excess precipitation during wetter months does not serve to refill the pond during drier months.

For example, see Sandpoint KSPT (NWS -- 108137), the annual precipitation deficit is -106 mm. However, April through September have positive precipitation deficit values. To properly estimate the annual volume of water necessary to refill a pond due to evaporation losses, the table will automatically enter a zero (0) for each month that the precipitation value is reported as a negative value.

As described above, precipitation offsets evaporation in winter months, so the net effect is that wintertime precipitation deficit is usually zero.

$$[(\text{mm/yr}) \div (\text{convert to feet})] \times (\text{Surface area of pond, in acres}) = \text{Evaporation Loss in Acre Feet}$$

$$(\text{483.29} \div 304.8) \times 2.73 = 4.3 \text{ AFA}$$

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
Existing open ditches from Elliot Creek and Unnamed Stream deliver water to the property for irrigation purposes. A ditch will convey water from the existing ditch system to the two ponds.
- b. Who owns the property at the point(s) of diversion? Elliot Creek LLC
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
Historical diversions for these water rights.
- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien:
- It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.
- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank? If yes, ☐ complete **Attachment WSB**.
- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
The land now irrigated will be under the footprint of the proposed ponds. They will no longer be irrigated.
- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
A new application for permit has been submitted for storage of the new ponds. A companion transfer application for a portion of 22-14026 will provide supplemental maintenance of the ponds. No other water rights appurtenant to the ponds. A stockwater right 22-12203, owned by applicant, overlaps the same legal description.
- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:
- Yes No
- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

Re: New applications for The Spetzler Family Trust

Dear Agent,

Please find enclosed three applications and a check in the amount of \$1,100 for filing fees as described below:

Application for Permit	\$200
Application for Transfer of 22-14026	\$200
Change in Nature of Use	\$250
Application for Transfer of 22-10762	\$200
Change in Nature of Use	\$250
	<u>\$1,100</u>

Please contact our office with any questions regarding these applications.

Thank you,

A handwritten signature in cursive script that reads "Kristin Moore".

Kristin Moore
Senior Water Rights Analyst

Enclosures: Application for Permit
