

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

Ident. No. 22-14346

RECEIVED
MAY 22 2019

1. Name of applicant(s) The Spetzler Family Trust Phone 602-549-1032
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address 6107 N Palo Cristi Rd City Paradise Valley
 State Arizona ZIP 85253 Email _____
2. Name of representative, if any Rocky Mountain Environmental Associates, Inc Phone 208-524-2353
 Mailing address 482 Constitution Way Ste 303 City Idaho Falls
 State ID ZIP 83402 Email kristin.rmea@gmail.com
- a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☒ Send original correspondence to the applicant and copies to the representative.
- b. ☒ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply Ground water which is a tributary of _____

4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
4N	45E	22			NW	NW	TETON	GROUND WATER	

5. Water will be used for the following purposes:

Amount 7.0 afa for Wildlife Storage purposes from 1/01 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)

6. Total quantity to be appropriated is (a) _____ cubic feet per second (cfs) and/or (b) 7.0 acre-feet per year (af).

7. Proposed diverting works:

- a. Describe type and size of devices used to divert water from the source. Ponds will be excavated and will fill naturally with ground water.
- b. Height of storage dam _____ feet; active reservoir capacity 7.0 acre-feet; total reservoir capacity 7.0 acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☒ No
- e. If well is already drilled, when? _____; drilling firm _____;
 well was drilled for (well owner) _____; Drilling Permit No. _____

For Department Use

Received by _____ Date _____ Time _____ Preliminary check by _____
 Fee \$ 100.00 Received by mp Receipt No. E045006 Date 5-22-19
200.00-mp

22-14346

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total feet of head and proposed capacity in kW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; must complete and attach the Municipal Water Right Application Checklist.
 - Domestic; show number of households _____
 - Other; describe fully. Wildlife storage for two shallow ponds: East pond (0.7 ac and 2.9 af) and West Pond (2.0 ac and 4.2 af) for a total surface area of 2.7 ac and total volume of 7.0 af
9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
4N	45E	22						W											

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? Other rights are being transferred for the maintenance of the pond, including existing right 22-4157 and a portion of water right 22-14026.
11. a. Who owns the property at the point of diversion? Applicant
- b. Who owns the land to be irrigated or place of use? Applicant
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____
12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. See attached narrative.
13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).
14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Proposed Water Right *Spetzler Family Trust*

RMEA #17-0146

by: KM

Date: 3/26/2019

22-14346

Narrative to Support Applications

The Spetzler Family Trust

Application for Permit

Application for Transfer of Water Right 22-4157

Application for Transfer of a Portion of Water Right 22-14026

The Spetzler Family Trust owns property located in Sections 21 and 22, T4N R45E, northwest of Victor, Idaho about 1 ¼ miles east of the Teton River. The property currently has water rights for stockwater and irrigation. The irrigation water right 22-4157 is for diversion of water from an Unnamed Stream and Elliot Creek for the irrigation of 49 acres. Applicant has also contracted to purchase 5.0 acres of ground water right 22-14026.

Two ponds are proposed to be developed. Pond surface area is designed to be 0.7 ac for the east pond and 2.0 ac for the west pond, for a total surface area of 2.7 ac. The ponds will be relatively shallow, resulting in a storage volume of 7.0 acre-feet total. The water right components will be provided through a combination of water rights applications as described in this narrative. This narrative will also serve to supply information necessary to satisfy Attachment #8a of the transfer applications.

Application for Permit

This application proposes to obtain authorization only for the impoundment of 7.0 af of water. No consumption of water is proposed under this water right. It is anticipated that the ponds will fill naturally from ground water due to the locally high water table. Intermountain aquatics performed ground water monitoring in 2018. Their results show that at the location of the east pond, ground water levels are at land surface year round. At the west pond location, ground water drops to within 1.7 feet below land surface. The west pond will be designed to accommodate the fluctuating water table.

The first time fill of the ponds will require 7.0 af of volume. Although the ponds will fill naturally from ground water, the volume will be mitigated by temporary non-use of 7.0 af of the transferred portion of water right 22-14026. The exact amount of acres required for non-use is determined based on the historical consumptive use of "alfalfa-less frequent cuttings," the historical crop irrigated by water right 22-14206. ET Idaho 2017 (Allen and Robison 2017), using the Driggs (NWS -- USC00102676) station, shows that alfalfa-less frequent cuttings has a net irrigation requirement of 617 mm/yr, or 2.02 ft/yr. (A copy of all ET Idaho 2017 values used in this report are included in Figure 1.) To obtain 7 af for pond fill, it would require non-use of 3.5 acres for one year.

$$7 \text{ af} / 2.02 \text{ ft/yr} = 3.5 \text{ acres}$$

The pond will be filled through a 1-year rental of 3.5 acres of ground water rights from the Water Supply Bank. The application to rent water will be submitted when a schedule is determined for excavation.

Application for Transfer of Water Right 22-4157

For the purposes of maintenance, both for evaporation and to assist with keeping the pond water fresh, it is proposed to convert a portion of water right 22-4157 to storage. Using IDWR's Pond Loss Calculation spreadsheet, evaporation was calculated to be 4.3 afa from the 2.7 acre ponds.

$$483.29 \text{ mm/yr} / 304.8 \times 2.7 \text{ ac} = 4.3 \text{ afa}$$

This value is based upon the precipitation deficit of Open Water – Shallow Systems, Driggs (NWS-USC00102676), from ET Idaho 2017, with removal of negative values. Figure 2 includes a copy of the Evaporation Loss Calculations from the IDWR Pond Loss Calculation spreadsheet.

Current land cover at the location of the ponds appears to fall within the description of Grass Hay. According to ET Idaho 2017, using the Driggs (NWS-USC00102676) station, Grass Hay has a net irrigation requirement of 612 mm/year, or 2.01 ft/year. It will require 2.1 acres of grass hay to provide the necessary volume of 4.3 afa as determined in the following calculation:

$$4.3 \text{ afa} / 2.01 \text{ ft/yr} = 2.1 \text{ ac}$$

The final footprint of the ponds will overlap the water right place of use by 2.4 acres. Although the ponds are only calculated to require 2.1 acres of water right, it is proposed to retire all 2.4 acres to provide additional flow.

Application for Transfer of Water Right 22-14206

Water right 22-4157, the existing surface water right, has a priority date of May 25, 1916. Under administration, this right will not be available during the peak of the irrigation season when temperatures rise. Therefore, additional water rights will be needed to provide adequate maintenance for the ponds. Applicant is contracted to purchase 5.0 acres of water right 22-14206, a primary ground water right. The contracted portion of this water right is proposed to be transferred to the applicant's property for the purposes of irrigation and pond maintenance.

To be conservative, the full evaporation of the ponds described in the previous section is considered for conversion of the ground water right. Consumptive use requirements are 4.3 afa. Historical irrigation under 22-14026, described above, indicates a consumptive use value of 2.02 ft/yr. A total of 2.1 acres are required to provide the necessary volume to maintain the pond.

$$4.3 \text{ af} / 2.02 \text{ ft/yr} = 2.1 \text{ acres}$$

The remaining purchased acres will be used for irrigation of 2.9 acres on the property, within a larger Permissible Place of Use, as identified in Attachment #7a of the transfer application.

Summary

The proposed ponds will have a total surface area of 2.7 acres and a volume of 7 af. The storage component of the ponds is proposed to be provided through an Application for Permit for a new water right. First time fill of 7 af is proposed to be provided through a Water Supply Bank rental of 3.5 acres. Maintenance of the ponds will be provided through two water rights: existing surface right 22-4157 and the purchased ground water right 22-14026. In effect, there will be redundant water rights for maintenance of the ponds, helping to provide sufficient water for evaporation and water for pond refresh, when available. Excess water will spill from the pond into a pond outlet that will flow to the creek.

User Input

Calculated value

Formula Explanations

The acronyms used on the Kimberly Research Center website are defined below:

P = Precipitation

ET= Evapotranspiration

P_d = Precipitation deficit

P_d =ET-P

USING THIS SPREADSHEET

Use the link below to access the Kimberly Research Center website. This website provides the Precipitation Deficit for a station most representative of the pond under examination. The Precipitation Deficit is the total amount of free water surface evaporation minus the precipitation for a given area, which gives the total amount of evaporative losses incurred by the pond. There are several weather sites that are used throughout the state. IDWR staff can find the nearest site using Arc Map. The shape file containing the sites can be found at X:/Spatial/Climate/ETIdahostations.shp.

Instructions:

1. Use the link below to navigate to ET Idaho 2012.
2. Select the station which is most representative to your pond location.
3. Click Submit Query.
4. Under "Land Covers with Evapotranspiration Estimates," select "Open Water - Shallow Systems (ponds, streams)" or "Open Water - small stock ponds" depending on the pond size.
5. Click the link to "Precipitation Deficit."
6. Reference and copy (ctrl + C) the first subheading "Mean" values.
7. Click the "Paste Values from ET Idaho" button. The table will automatically enter a zero (0) for any negative precipitation deficit values.

November	-0.29	30	0.00
December	-0.76	31	0.00

Total mm/year = 483.29

$$[(\text{mm/yr}) \div (\text{convert to feet})] \times (\text{Surface area of pond, in acres}) = \text{Evaporation Loss in Acre Feet}$$

483.29

÷

304.8

) X

2.73

=

4.3 AFA

PLEASE NOTE: The seasonal average for precipitation deficit should not be used for calculations because precipitation often exceeds evaporation during wetter months of the year. If the pond is kept full, excess precipitation during wetter months does not serve to refill the pond during drier months.

For example, see Sandpoint KSPT (NWS -- 108137), the annual precipitation deficit is -106 mm. However, April through September have positive precipitation deficit values. To properly estimate the annual volume of water necessary to refill a pond due to evaporation losses, the table will automatically enter a zero (0) for each month that the precipitation value is reported as a negative value.

As described above, precipitation offsets evaporation in winter months, so the net effect is that wintertime precipitation deficit is usually zero.

RE: Transfer No. 83380 and 83382
Application for Permit 22-14346

Dear Applicant(s):

The Department of Water Resources has received your water right transfers and application for permit. Please refer to the transfer and application numbers referenced above in all future correspondence regarding these applications.

A legal notice of the application has been prepared and is scheduled for publication in the TETON VALLEY NEWS on July 3 and 10, 2019. Protests to this application may be submitted for a period ending ten (10) days after the second publication (**on July 22, 2019 at 5:00 pm**).

If the applications are protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the applications are not protested, the Department will process your applications and notify you of any action taken on the applications. If your applications are approved, the Department will send you a copy of the approval documents.

Please contact this office if you have any questions regarding the application.

Sincerely,

Sharla Cox
Administrative Assistant

RE: Application for Permit 22-14346 (**Michael Processed, Protest date 7/22/19**)

Dear Watermaster:

A copy of the above referenced application is enclosed. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered during regional review. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Please contact this office if you have any questions regarding the application.

Sincerely,

Sharla Cox
Administrative Assistant

Permits will be subject to all prior water rights. For additional information concerning the property location, contact Eastern Region office at (208) 525-7161. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, Eastern Region, 900 N SKYLINE DR STE A, IDAHO FALLS ID 83402-1718 together with a protest fee of \$25.00 for each application on or before July 22, 2019. The protestant must also send a copy of the protest to the applicant.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

TRANSFER NO. 83366

FERRARONE FAMILY LIVING TRUST, 8 RYAN AVE, MILL VALLEY, CA 94941-2124; has filed Application No. 83366 for changes to the following water rights within TETON County(s): Right No(s). 22-10762; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx. The purpose of the transfer is to change a portion of the above rights as follows: change nature of use, change period of use, and change place of use. 4.4 acres of irrigation under this right will be changed in order to enlarge 2 existing ponds for wildlife habitat. Diversion to storage will be 0.30 cfs from Woods Creek for 37.2 acre-feet of wildlife storage. Water will be stored from 1/1 to 12/31. The place of use for wildlife storage will be SWNE and SENE Sec 32, and SWNW Sec 33, T5N R45E. The point of diversion will not change.

TRANSFER NO. 83372

FERRARONE FAMILY LIVING TRUST, 8 RYAN AVE, MILL VALLEY, CA 94941-2124; has filed Application No. 83372 for changes to the following water rights within TETON County(s): Right No(s). 22-14026; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx. The purpose of the transfer is to change a portion of the above rights as follows: change nature of use, change period of use, change point of diversion, and change place of use. The point of diversion for irrigation and diversion to storage will be in SENE Sec 32 T5N R45E for 0.12 cfs from ground water. The place of use for irrigation will be within SENE Sec 32, and NWNW and SWNW Sec 33, T5N R45E for 5.6 acres within a 119-ac permissible place of use. The place of use for wildlife storage will be within SWNE and SENE Sec 32, and SWNW Sec 33, T5N R45E. Water will be stored from 1/1 to 12/31.

TRANSFER NO. 83382

THE SPETZLER FAMILY TRUST, 6107 N PALO CRISTI RD, PARADISE VLY, AZ 85253-3747; has filed Application No. 83382 for changes to the following water rights within TETON County(s): Right No(s). 22-14026; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx. The purpose of the transfer is to change a portion of the above rights as follows: change nature of use, change period of use, change point of diversion, and change place of use. The point of diversion for irrigation and diversion to storage will be in NWNW Sec 22 T4N R45E for 0.06 cfs from ground water. The place of use for irrigation will be within NENE Sec 21, and NWNW and SWNW Sec 22, T4N R45E for 2.9 acres within a 114-ac permissible place of use. The place of use for wildlife storage will be within NWNW Sec 22 T4N R45E. Water will be stored from 1/1 to 12/31.

TRANSFER NO. 83380

THE SPETZLER FAMILY TRUST, 6107 N PALO CRISTI RD, PARADISE VLY, AZ 85253-3747; has filed Application No. 83380 for changes to the following water rights within TETON County(s): Right No(s). 22-4157; to see a full description of these rights and the proposed transfer, please see www.idwr.idaho.gov/apps/wr/QueryNewTransfers/QueryNewTransfers.aspx. The purpose of the transfer is to change a portion of the above rights as follows: change point of diversion, change nature of use, and change period of use. 2.4 acres of irrigation under this right will be changed in order to create 2 ponds for wildlife habitat. The points of diversion will be in NENENW, SENWNW (new), and NESWNW Sec 22 T4N R45E. Diversion to storage will be 0.05 cfs from unnamed stream and Elliot Creek for 4.3 acre-feet of wildlife storage. Water will be stored from 1/1 to 12/31. The place of use will not change. For additional information concerning the property location, contact Eastern Region office at (208) 525-7161. Protests may be submitted based on the criteria of Idaho Code Sec. 42-222.

Any protest against the proposed change must be filed with the Department of Water Resources, Eastern Region, 900 N SKYLINE DR STE A, IDAHO FALLS ID 83402-1718 together with a protest fee of \$25.00 for each application on or before July 22, 2019. The protestant must also send a copy of the protest to the applicant.
