Re: Water Right Application Incomplete - Returned

Dear Applicant:

This office received your application on May 23, 2019. The application cannot be accepted into the records of the Idaho Department of Water Resources (IDWR) until the following items are addressed:

- The map submitted with your permit application contains a red outline clearly identifying the newly acquired land. The place of use description in Table 9 of the form must match the map. Please amend it accordingly.
- Your property lies within Water District 63. All groundwater applications within this boundary are advertised with a water bearing zone (WBZ). Please identify both the shallowest and deepest depths of your well system (i.e. WBZ = 150 to 400 ft.)

The original incomplete application is enclosed. Please make the necessary amendments to the original form and re-submit within the next thirty (30) days. If IDWR does not receive your written response within thirty (30) days, a refund will be issued for this filing. This letter is an attempt to ensure that your application is complete in order to establish a priority date. You may receive future correspondence regarding more specific details of your application.

You also submitted an Application for Amendment of a Permit for water rights 63-31635, 63-31636 and 63-34655. Because 63-31635 and 63-31636 are decreed water rights and no longer in the permitting stage, a transfer form is the appropriate filing to change the place of use and points of diversion for these rights. IDWR transfer forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me if you have any questions about the necessary information.

Sincerely,

Patrick Kelly
Water Rights Supervisor
