RE: RETURNED APPLICATION(S) TO LEASE AND Rent WATER RIGHT NO. 37-21835 TO THE WATER SUPPLY BANK

Dear Applicant:

The Department of Water Resources (Department) has completed a preliminary review of your applications to lease and rent water right 37-21835 to and from the Water Supply Bank (Bank).

The Bank rule 25 provides criteria to be considered when determining whether to accept a water right into the Bank. One of the criteria for consideration is enlargement of use through lease or rental of the water right. Water right 37-21835 is decreed for Irrigation Storage and Irrigation from Storage for 188.0 AF and 229 acres within a 688 acre place of use, when combined with rights 37-2089 and 37-2244B. Once the water from 37-21835 is diverted and stored, this water is considered appropriated. It therefore cannot be idled per a lease contract with the Bank.

Application to lease all of 37-21835 was accompanied by a rental application to rent right 37-21835 back from the bank and apply on acres in combination with the portion not leased to the bank under right 37-2089. A lease and rental application to apply right 37-21835 in accordance with the decreed place of use and out of the decreed point of diversion is not necessary.

Here are some options for moving forward with the applications submitted.

1. The Bank can process the lease for 37-2089 and 37-2244B as submitted and you can withdraw the applications to lease and rent 37-21835.
2. You can provide a plan that shows how you intend to eliminate the storage of water under 37-21835. Then the Bank could accept this water right into the Bank. However, this will make it impossible to rent the portion back from the bank.
3. Provide a plan to show how you will reduce the storage of water under 37-21835 and only lease the reduced amount to the bank.

Please provide information to show how you want us to proceed within 30 days or your applications for water right 37-21835 will be returned unprocessed. Then the Bank will process the leases for 37-2089 and 37-2244B as described in 1. above.

If you have any questions, please contact me at (208) 287-4910.

Sincerely,

CLAY WEBSTER,

Re: Application to Lease Water Right No. 37-21835 to Water Supply Bank;
Application to Rent Water Right No. 37-21835

Dear Mr. Webster:

Thank you for your letter of April 25, 2019 addressed to Dennis Strom of Strom Ranches, Inc. regarding the above-referenced applications. Additionally, thank you for speaking with me regarding the same earlier today and helping me to understand IDWR's changed position with respect to storage water rights being leased to the Water Supply Bank.

After speaking with my client about the issue, he has determined that he would like to withdraw both of the applications from consideration. Accordingly, please consider this a withdrawal of Application to Lease Water Right No. 37-21835 to Water Supply Bank and Application to Rent Water Right No. 37-21835 from the Water Supply Bank. Mr. Strom requests that the Department continue processing the applications for water right nos. 37-2089 and 37-2244B.

Please contact me directly with any further questions or concerns you may have regarding this matter. Thank you.

Sincerely,

Charles L. Honsinger

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via IDWR's website.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. 5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☐ No ☒

If no, list previous rental requests/agreements and explain why you have not secured a permanent water right for your needs:

Previous rental of this water right owned by applicant commenced in 2014 and was used for the succeeding
years until present. It is necessary to place this water right in the Water Supply Bank and then lease it back out
as it is stacked with other rights proposed to be leased to the Water Supply Bank.
