

MEMORANDUM

To: Water Right File No(s). 63-32573
From: Ashley Ritter
Date: May 15, 2019
Re: Monitoring requirements for Permit 63-32573 (M3 Eagle/Spring Valley)

On January 2, 2019 Hydro Logic, Inc. submitted Spring Valley (M3 Eagle) Second Half of 2018 Ground Water Monitoring Data Submittal for Permit 63-32573 on behalf of the City of Eagle (permit applicant). The applicant is required to meet monitoring and reporting obligations stipulated in the conditions of the water right permit and to submit data in a timely manner every six months for the wells stipulated to be monitored in the monitoring plan.

Hard copies of the raw data submitted on CD form will be included in the file for this water right. Electronic data will be forwarded to the Hydrology Section to be backed up on a network server and published to the HydroOnline application on the IDWR website.

The applicant is currently meeting the monitoring obligations through the bi-annual data submittals that IDWR has been receiving since the water permit was approved. It is reported that no municipal ground water production has been diverted under Permit 63-32573.
