

MEMORANDUM

Date: April 10, 2019
To: Transfer 83137
From: Amanda Fowler
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to rearrange place of use for water right 31-7567.

Authority to File:

The applicant is the current water right owner of record. The applicant is the property owner of the proposed place of use. The applicant has the authority to make the change.

Water Right Validity:

The right included in this transfer was licensed in 2013. Review of 2017, 2015 and 2013 aerial photography indicate growing vegetation on the current place of use. Forfeiture is not an issue.

Injury to Other Water Rights:

Other water rights will not be injured by the proposed change. The place of use is simply being rearranged in close proximity to the current place of use. Neither the points of diversion nor the quantity authorized to be diverted will change as a result of the transfer. The watermaster for WD 110 does not oppose the transfer. Since it is clear that the proposed change will not adversely impact other water rights, this application will not require public notice.

Enlargement of Use:

The proposed change will not result in enlargement because neither rate nor volume nor irrigated acreage will increase as a result of the transfer. The place of use for the transferred right is simply being rearranged. There are no overlapping water rights on the property.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Effect on Economy the Local Area:

No issues identified.

Effect on Agricultural Base of the Local Area:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
