IN REVIEWING THE FILE ON THESE LICENSES I BELIEVE THAT THE SOURCE SHOULD BE LISTED AS TAYLORS SLOUGH AND NOT GROUNDWATER. IN THE EXAMINERS REPORT DIVERSION NO. 2 STATES "DIVERTS FROM SLOUGH". ALSO DIVERSION #1 INDICATES THAT THERE IS A 10 FOOT LIFT TO A SUMP. TRANSFER # 889 TRANSFERS BOTH PARTS A & B TO THE SAME P/U. PLEASE NOTIFY ME WHAT YOUR DECISION IS ON HOW THESE LICENSES SHOULD READ.

You wrote me a memo on May 6, 1988, stating that you thought the source listed in License No. 35-2052 is erroneous. I cannot determine whether the two pumps discussed in the examiners reports pump from groundwater-to-slough then slough-to-field respectively, or whether both pumps pumped from surface water. The fact that artesian pressures exist in the vicinity also complicates the interpretation. I suggest we wait for the adjudication to resolve the question.
