

State of Idaho
Department of Water Resources
Permit to Appropriate Water
No. 96-9710

Priority: August 01, 2018

Maximum Diversion Rate: 0.18 CFS

This is to certify that

KEVIN MORSE 277 N RIVER LAKE DR CLARK FORK ID 83811
WENDY MORSE 277 N RIVER LAKE DR CLARK FORK ID 83811

has applied for a permit to appropriate water from:

Source : CLARK FORK RIVER**Tributary:** LAKE PEND OREILLE

and a permit is APPROVED for development of water as follows:

<u>Beneficial Use</u>	<u>Period of Use</u>	<u>Rate of Diversion</u>
IRRIGATION	04/01 to 10/31	0.02 CFS
FIRE PROTECTION	01/01 to 12/31	0.18 CFS

Location of Point(s) of Diversion

CLARK FORK RIVER NE¼, SE¼, Sec. 11, Twp 55N, Rge 02E, B.M., BONNER County

Place of Use: IRRIGATION

			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE		
55N	02E	11													X L6					

Conditions of Approval

1. Proof of application of water to beneficial use shall be submitted on or before **May 01, 2020**.
2. Subject to all prior water rights.
3. This right does not grant any right-of-way or easement across the land of another.
4. The Place of Use (POU) does not include federal land.
5. Neither the Point Of Diversion (POD) nor the Place Of Use (POU) for this right lie on property owned by the U.S. Forest Service or the U.S. Bureau of Land Management.
6. A fish screen of 1/4 inch or smaller mesh shall be installed and maintained at the Point Of Diversion (POD).
7. Water shall not be diverted for fire protection use under this right except to fight or repel an existing fire.

State of Idaho
Department of Water Resources
Permit to Appropriate Water
No. 96-9710

8. Water shall not be diverted under this right when flows in the Clark Fork River are below minimum flow amounts as defined by Right 96-8718. The right holder shall be responsible for monitoring the daily flow of the Clark Fork River using real-time data and shall cease diverting water when flows in the Clark Fork River are below established minimum flow amounts. Unless otherwise specified by the Director of the Department of Water Resources, data from the U.S. Geological Survey gauging station at Whitehorse Rapids near Cabinet Idaho, No. 12392000, may be used for purposes of determining the daily flow amounts.
9. Water shall not be diverted under this right when flows in the Pend Oreille River are below minimum flow amounts as defined by Right 96-8730. The right holder shall be responsible for monitoring the daily flow of the Pend Oreille River using real-time data and shall cease diverting water when flows in the Pend Oreille River are below established minimum flow amounts. Unless otherwise specified by the Director of the Department of Water Resources, data from the U.S. Geological Survey Pend Oreille River gauging station at Newport, Washington No. 12395500, may be used for purposes of determining the daily flow amounts.
10. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.0 afa per acre at the field headgate for irrigation of the place of use.
11. This right when combined with all other rights shall provide no more than 0.02 Cubic Feet Per Second (CFS) nor more than 1.2 Acre Feet (AF) annually at the field headgate for irrigation of the POU.
12. POU is located within Lot 7, 1st Addition, River Lake Estates subdivision.

This permit is issued pursuant to the provisions of Idaho Code § 42-204.

Signed this 19th day of April, 2019.

RE: Permit No. 96-9710

Permit Approval Notice

Dear Permit Holder(s):

The Department of Water Resources ("Department") has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review all the conditions of approval listed on your permit. The conditions include requirements that you must accomplish, such as timely submittal of proof of beneficial use or installation of a measuring device, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district. Failure to comply with the conditions of approval may result in your permit lapsing or being canceled.

The permit is a PRELIMINARY ORDER issued pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

The final step in the water right process is issuance of a water right license. To receive a water right license, you must divert and use water to the full extent intended and submit a *Statement of Completion for Submitting Proof of Beneficial Use* ("Proof") by the date shown in condition no. 1 of your permit. The Department will send you a *Proof Due Notice* approximately 60 days prior to the date listed in condition no. 1 of your permit. If you have already diverted and used water to the full extent intended, you may complete and submit the enclosed Proof form immediately.

You may also require approvals from other Department programs, such as Ground Water Protection, Safety of Dams, or Stream Channel Protection, to accomplish your

proposed development. Please call or visit any Department office or see the Department's website at idwr.idaho.gov for more information about these programs.

Also, please note that permit holders are required to report any change of ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Forms to assign ownership or update your address are available from any office of the Department or on the Department's website.

If you have any questions concerning the enclosed information, please contact the Northern Region Office at (208) 762-2800.

Sincerely,

Douglas Jones
Northern Regional Manager

Administrative Assistant 1

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Subject: RE: Application for Permit 96-9710 (Morse)
Attachments: Morse 1894 survey.pdf

Steve:

Sorry for the delay in getting back to you on this Application for Permit on the Clark Fork River. I reviewed the attachments you sent in your December 7, 2018 message and reviewed the attached 1894 survey map. I will try to reach you this afternoon via phone.

My interpretation of the correct legal descriptions after looking at the above attachment (1894 Survey Northern Pacific R.R. route and yellow shaded Govt Lot 6) is as follows:

- 1) The Morse Point of Diversion in the Clark Fork River is in T55N R02E S.11 NE SE
- 2) The place of use is in Govt Lot 6, T55N R02E S.11 NE SE

My understanding is that U.S. Department of Justice & IDWR staff have communicated about the following language when there is a concern about federal land being within the same legal description as privately owned property that is the Place of Use for a water right.

'The place of use does not include federal land.'

Thanks,

Shaun Maxey

Subject: Application for Permit 96-9710

Shaun,

I have reviewed Application for Permit 96-9710 filed by Kevin and Wendy Morse. I have a concern with the legal description of the POD and POU, T55N R2E NESE. The attached BLM MTP shows the NESE Sec 11 is split by the Clarke's Fork. The portion of the NESE north of the river is Lot 5, which is National Forest System (NFS) land. The portion of the

NESE south of the river is private land that is part of Lot 6. Because there are surveyed government lots it is imperative that the legal description for 96-9710 include that it is in Government Lot 6. The Morse property is clearly south of the river in the NESE – Lot 6.

The Morse application places an 'N/A' in the Lot block of the legal description. This is incorrect. The aerial photo that is part of their application clearly shows 'Lot 6' (NESE). I know these legal description nuances can be confusing for many people. To prevent confusion and uncertainty in the future I'm requesting that Lot 6 be added to the legal description of the POD and POU in 96-9710.

If you have any questions about this matter please contact me.

Thank you,

Steve

MEMORANDUM

DATE: December 21, 2018

TO: Tammy Alleman, IDWR

FROM: Emily Skoro, Staff Engineer, Water Projects Section,

RE: IDWR Application for Permit No. 96-9710

The Idaho Water Resource Board (Board), would like to submit the following comments for consideration when processing the Application for Permit No. 96-9710. The applicant is requesting a water right for an irrigation and fire protection beneficial use with a total diversion rate of 0.18 cfs. The water supply source is the Clark Fork River which is a tributary to Lake Pend Oreille.

The applicant should be aware that the Board holds a minimum stream flow (MSF) water right 96-8718 on the Clark Fork River on the same river reach as the applicant's point of diversion (POD). Any water rights with a priority date junior to the Board's water right should be administered in priority and may be curtailed if the MSF is not being met. USGS Gage 12392000 (Clark Fork at Whitehorse Rapids near Cabinet ID) is located along the Board's MSF water right. Historic records show that this reach of the Clark Fork River is generally below the MSF most of the year except parts of May, June, and July during low flow years. Therefore, flows measured at the referenced gage should be used to verify current Clark Fork River stream flows and diversions should be limited to times when the Board's MSF water right is met. Please see the attached Proof Report for the diversion rates authorized under the Board's MSF water right 96-8718.

The Board also holds a MSF water right 96-8730 on the Pend Oreille River downstream of the applicant's POD. Any water rights with a priority date junior to the Board's water right should be administered in priority and may be curtailed if the MSF is not being met. USGS Gage 12395500 (Pend Oreille River at Newport WA) is located along the Board's MSF water right. Historic records show that this reach of the Pend Oreille River is generally below the MSF most of the year except parts of May and June during low flow years. Therefore, flows measured at the referenced gage should be used to verify current Pend Oreille River stream flows and diversions should be limited to

times when the Board's MSF water right is met. Please see the attached Proof Report for the diversion rates authorized under the Board's MSF water right 96-8730.

Place Of Use

MINIMUM STREAM FLOW

Conditions of Approval:

1. Establishment of a minimum flow on the Pend Oreille River in the requested reach shall serve to protect water released from Albeni Falls Dam as it flows through the requested reach at rates up to the established flow, but shall not directly or indirectly cause any change in the operation of Albeni Falls Dam.

Upon the future finding and order of the Director that gaging stations are required to maintain the approved minimum stream flow, the right holder shall permanently install and maintain gaging stations as specified by the department.

The Director retains jurisdiction, as described below, to review and amend any and all parameters of this right. The Board, upon receiving a request, or upon its own initiative, may petition the Director for an amendment to the right. The petition must set forth any significant change in circumstances and evidence of the public interest supporting the proposed amendment. The Director will notify the general public and specific persons or known interested parties of the proposed change, and conduct a hearing for the purpose of determining whether the right should be amended in the public interest. The burden of proof at the hearing shall be upon the persons or parties seeking the amendment to establish that the amendment of the right would be in the public interest.

This minimum stream flow begins at Albeni Falls Dam in the NWNW, S29, T56N, R5W

IDAHO DEPARTMENT OF WATER RESOURCES
Proof Report

10/12/2018

and ends 2.4 miles downstream at the state line on the west side of Sections 13 and 24, T56N, R6W.

This minimum stream flow is for the protection of fish and wildlife habitat, aquatic life and recreational values.

2. 027 Use of water under this right shall be non-consumptive.
