

We are protesting water application 65-23827 by Canaday Properties LLC, Warren and Deon Budell. Our existing water right 65-87 could potentially be impacted by this water right if approved. We would like clarification on how the applicant intends to operate under this application. Will there be any changes? If so what are they?

The application specifically mentions the use of wheel lines. This would indicate a definite change of operations and use as there is currently no irrigation provided to the location in the application. Current use is used for stock water. If wheel lines or other means of surface irrigation are implemented, water levels in the storage reservoir will drop. There is virtually no stream flow in late July, August and September, with primary flows from runoff in late spring and early summer. Possible complaints by the applicant or future owners of us taking more than our share as temperatures rise and water levels decrease could arise.

Anna,

Please find attached the Basis of protest in the water right application by Canaday Properties for permit number 65-23827.

I will review the pre-hearing calendar and send that in a separate email.

Please let me know if you do not have all the necessary documentation for the protest.

Regards,
Sharon Pratt
