MEMORANDUM

TO: File 27-02125

FROM: Sharla

DATE: August 12, 1992

RE: Transfer Review (No. 3949)

The above referenced transfer application proposes to change the point of diversion (well) under a portion of this right and the associated SRBA claim. Since this filing is for a point of diversion change only, the standard conditions requiring the change to be accomplished within one year will not be added. However, the condition regarding further review in SRBA (T09) will be added per Ernie Carlsen's memo of 6/5/92.

Advertising was completed correctly. There is no indication that a drilling permit has been obtained. Therefore, the standard condition regarding drilling permit requirements will be added.

Ernie's memo of 6/5 documents the recommendations for reduction of acres and rate of diversion (76 acres/1.52 cfs). On 8/12 I spoke with Mr. Stecklein about these recommendations. He stated that he preferred it was approved for 78 acres, but agreed to the 76 acres after I explained the reason for the reductions in light of Ernie's findings.

The transfer can be approved with the following conditions:

- T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
- 043 If construction of the well under this right was not initiated prior to July 1, 1987, commencement of well construction or diversion of water under this right is prohibited unless a drilling permit is obtained from the Department.

RE: Application for Transfer A27-02125A
LaVerelle Stecklein

PURPOSE OF APPLICATION

This transfer was filed with the intent of establishing a new point of diversion for the portion of license 27-02125 which is appurtenant to the property purchased by the applicant. The license was issued at a rate of 0.02 cfs per acre and covered 76 acres of the 80 acre tract now owned by the applicant. The transfer application was prepared based on the applicants SRBA Notice of Claim which shows a place of use of 78 acres.

FINDINGS

Information obtained from the Bingham County Assessors Office, by telecon with Audrey on June 5, revealed the property is owned by the applicant and assessed as 4 acres of waste and 76 acres of irrigated agriculture.

On June 5, 1992, I met the applicant at the place of use and we reviewed historical use of the water right and his proposal to drill a new well. We visited the original well which consists of a old truck engine powering a right angle gear head. A plate on the gear head shows it is rated for 50 HP at 1730 RPM. The applicant believes the well is over 100 feet deep. Water from the well open discharges into a ditch flows north and empties the into the Center Ditch. Historically the place of use was flood irrigated with decreed Blackfoot River water and water from the well both delivered through the Center Ditch. The applicant converted to sprinkler irrigation two years ago and now pumps the decreed surface water from the Riverton Ditch. This pump is in the same area where he proposes to drill the new well. The applicant also stated around 76 acres is irrigated within the designated place of use. Some acreage is lost to county roads and about 1 acre of nonirrigated land in the NE corner containing out buildings. The 76 acre figure is also consistent with the acreage listed on the SRBA Notices for the decreed surface water rights (see attached sheet).

A survey of the area revealed the closest existing irrigation well is 3/8 mile west of the location for the proposed well and owned by the applicant. This well is around 146 feet deep. The applicant felt the new well would have to

RECORDED

DEC 08 1992

drilled to a depth of 125 to 150 feet. He also stated the ground water table in his wells was holding. There are several domestic wells within 1/4 mile to the east and west of the proposed well location along Riverton Road.

RECOMMENDATION

Based on the results of my investigation the applicant's adjudication claim (A27-02125A) will have to be reduced to 76 acres and a rate of diversion of 1.52 cfs. Less than half of the license has been claimed in the SRBA, however, this does not effect the transfer application.

I would recommend we grant the transfer but limit the place of use to 76 acres with 38 acres in each 1/4/4 and also reduce the diversion to 1.52 cfs. The period of use has already been changed to reflect the new season of use. The standard conditioning concerning the SRBA should also be included on the transfer.

RE: Application No. A27-02125A

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Morning News on 5-21 & 28-92. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor

RE: Discrepancy in SRBA claimed acres vs. WR licensed acres

A quick review of the portion of 27-02125 claimed under SRBA Notice A27-02125A showed that 2 additional acres have been claimed in the SE 1/4 SW 1/4 of Section 13, Township 3 South, Range 34 East.

A further check of the other claimed portions of 27-02125 shows that a total of only 118 acres of the originally licensed 200 acres have been claimed.

I recommend that the Adjudication Bureau review this transfer prior to its approval.
