CONDITIONS OF APPROVAL AND REMARKS

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre for the lands above.
3. After specific notification by the department, the right holder shall annually report the amount of water diverted to the department.
4. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
5. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
8. The total instantaneous diversion of water from all points of diversion under Transfer No. 4866 shall not exceed 9.29 cfs, nor total combined annual volume of 3390.4 af.
- * 9. Right No. 22-07127 is limited to the irrigation of 402 acres in the place of use described above in a single irrigation season.
- * 10. Right No. 22-07222 is limited to the irrigation of 459 acres in the place of use described above in a single irrigation season.
- * 11. Right No. 22-07406 is limited to the irrigation of 468 acres in the place of use described above in a single irrigation season.

Dated this 22nd day ofAugust, 19 96

Chief, Water Alloc. Bureau

MEMORANDUM

TO: FILE NOS. 22-07127, 22-07222 & 22-07406

FROM: PAM SKAGGS/^{CP}STATE OFFICE

SUBJECT: TRANSFER NO. 4866

DATE: August 20, 1996

=====

Transfer No. 4866 was filed to add a third well to the existing combined system serving Right Nos. 22-07127, 22-07222 and 22-07406. The second well developed under approved Transfer No. 4127 proved to have difficulty producing sufficient water due to sand and gravel. This third well is needed to provide the licensed rate of diversion and increase efficient system distribution.

Recommended conditions include drilling permit requirements, irrigation overlap, multiple points of diversion/measuring devices, future annual reporting, permissible place of use and standard transfer conditions.
