=====

Transfer No. 4980 changes the water right record specifically identifying the historical point of diversion and place of use under a portion of Right No. 13-00053, splitting the right into parts A & B. No physical change in use of the water right will occur through this approval. ✓

The original decreed right identified 4 separate owners with a non-specific place of use and no point of diversion description. The applicant identified 23 specific acres and the current point of diversion to accurately describe her portion of the right. ✓

The decree also identified the date of priority by year only. The approval identifies the first day of the standard irrigation season. Season of use and diversion volume were adjusted to current standards. ✓

Recommended conditions include watermaster control, measuring device/lockable controlling works, irrigation overlap and standard transfer conditions. ✓
