Narrative: The Department received these applications on March 11, 2019. The applicant wishes to place a portion of each right in the Bank. Water right 34-2304 was decreed in 1997 and 34-7025 was decreed in 2002. These portions have been in the Bank 2014. Forfeiture is not an issue. Water right 34-2304 is for 359.0 acres and 34-7025 is for 416.0 acres and these two rights are limited to the irrigation of 416.0 acres. The applicant will be irrigating 408.9 acres so 7.1 acres are being offered to the Bank. The pivot corners will be idled. The total acres of these corners is more than 7.1 acres but with the acre limit of the two rights combined, the 7.1 acres offered to the Bank is correct. These rights are currently within WD 34.

Jean,

The shapefile for the water rights does not match very closely at all. It is far larger than it should be. So the map shows the acres that are not being irrigated to show that the total irrigated acres will not exceed the water right, including what is offered to the Bank. If you prefer, I can send another map that shows a specific 13.2 acres.

Subject: WSB Leases for Pehrson

I am reviewing the lease applications for Byron Pehrson, water rights 34-7025 & 34-2304. The acres on the application do not match the acres on the map. I have attached copies of the applications and maps. The maps show over 40 acres being offered to the Bank while the applications show a combined total of 13.2 acres. The last contract had a total of 41.3 acres for water right 34-7025 and 28.0 acres for water right 34-2304 with a combined limit of 41.3 acres. If your client wants to only lease 13.2 acres, I will need another map showing which acres will be idled. If your client would like to same acres leased that have been leased in the past, you need to let me know, in writing, and I will continue processing the applications. Please let me know within 30 days or the applications will be returned unprocessed. Please call if you have any questions. Thank you.

Jean,

See the attached map showing a total of 7.1 acres proposed to be leased to the WSB (not 13.2 ac). The two water rights 34-2304 and 34-7025 have combined limitations and are not additive. The shapefile is incorrect for the water rights and does not represent how the rights are described. In addition, the rights, although they share limitations, are described as overlapping, but not with the same amounts of acres per QQ. The best way to evaluate this right for me was to subtract the total irrigated acres from the total decreed acres, which is a combined 7.1 acres, recognizing that the shapefile doesn't match either water right. Hence, the map that I submitted originally. On the attached map, I identified 7.1 acres in a QQ in which both rights have almost the same acres that are dry.

Please let me know if there are any other questions or concerns.

Thanks,

Kristin Moore
