WATER SUPPLY BANK LEASE CONTRACT No. 958

8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The unleased portions of water rights 34-12378 and 34-13829 when combined shall not exceed a total diversion rate of 3.19 cfs and the irrigation of 221.1 acres.
13. Water right 37-13829 when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
14. The unleased portion of water right 37-13829 is limited to the irrigation of 159.7 acres within the authorized place of use in a single irrigation season.
15. The unleased portion of water right 34-12378 is for an enlargement of 61.4 acres within the place of use described for this right.
16. Water right 34-12378 is based upon an enlargement of Right No. 34-13829 pursuant to Section 42-1426, Idaho Code.
17. Rights 34-28G, 34-131B, 34-132B, 34-191 and the unleased portions of 34-12378 and 34-13829 when combined shall not exceed a total diversion rate of 5.53 cfs and the irrigation of 221.1 acres.

- A. Is the diversion works or system owned or managed by an irrigation district or water delivery company? Yes ☐ No ☒
If yes, provide written consent from the company, corporation or irrigation district authorizing the proposed sale or lease (Attachment 4A).

If your water right is delivered through a canal, lateral or ditch operated by a canal company, irrigation district, or similar delivery entity, your lease request must include written consent from the company, district, or similar entity for your removal of water from its system pursuant to Section 42-108, Idaho Code and IDAPA WSB Rule 37.02.03.25.02e.

- E. Will the present place of use continue to receive water from any other source? Yes ☐ No ☒

If yes, explain the relationship between the different water sources and how enlargement of the authorized use will not occur if this water right is leased. The overlapping surface rights are used entirely to support irrigation under the pivots and a few handlines.

- A. Is the diversion works or system owned or managed by an irrigation district or water delivery company? Yes ☐ No ☒
If yes, provide written consent from the company, corporation or irrigation district authorizing the proposed sale or lease (Attachment 4A).

If your water right is delivered through a canal, lateral or ditch operated by a canal company, irrigation district, or similar delivery entity, your lease request must include written consent from the company, district, or similar entity for your removal of water from its system pursuant to [Section 42-108, Idaho Code](#) and [IDAPA WSB Rule 37.02.03.25.02e](#).

- B. Please provide a description of the current water diversion and delivery system.

Well to mainline to sprinkler irrigation system, including three pivots and handlines.

- C. Describe any other water rights used for the same purpose at the same place of use as the water right being offered to the Bank. Water rights 34-28G, 34-191, 34-131B, 34-132B, and 34-12378 partially overlap the same place of use.

Right 34-12378 is also offered to the bank.

- D. Are any of the water rights identified in Section 4C stacked with the water right proposed for lease? Yes ☒ No ☐

Stacked water rights are used together to achieve a common beneficial use, such as irrigation of the same lands. Stacked water rights cannot be separated and must be jointly leased to the Water Supply Bank. Stacked water rights qualify for the multiple fee payment of \$500.

- E. Will the present place of use continue to receive water from any other source? Yes ☐ No ☒

If yes, explain the relationship between the different water sources and how enlargement of the authorized use will not occur if this water right is leased. The overlapping surface rights are used entirely to support irrigation under the pivots and a few handlines.

- F. Identify annual volumes and/or rates of water diverted in the last 5 years to accomplish the beneficial use authorized by this water right. Water right was leased to the WSB from 2014-2018.

- G. Has any portion of this water right undergone a period of five or more consecutive years of non-use? Yes ☐ No ☒

If yes, describe the circumstances and attach evidence to demonstrate how the water right has not been lost through forfeiture (Attachment 4G). See [Section 42-223, Idaho Code](#) for exceptions to forfeiture. Your application may be denied if forfeiture concerns are not addressed.

- H. Is this water right involved in any other IDWR process, such as an application for transfer or a mitigation plan?

If yes, describe.

13	Narrative: The Department received these applications on March 8, 2019. Loy Pehrson, one of the current owners, signed the application. The applicant wishes to place a portion of each water right in the Bank. It appears the applicant wants to put in the Bank the same acres that have been in the Bank since 2014. 8.6 acres of 34-12378 and 22.3 acres of 34-13829 for a total of 30.9 acres of these ground water rights. There are surface water rights that overlap these but they were not offered to the Bank as they are considered to be contributing to the current irrigation. The acres offered to the Bank are the pivot corners. These rights were decreed in 2001 and were irrigated until they were placed in the Bank in 2014. Forfeiture is not an issue. These rights are currently within WD 34. See the backfile for additional information.
