Conditions of Approval:

1. 065 The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
2. 104 If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
3. WB7 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 495.0 af at the field headgate for the lands above.
4. R61 This right when combined with all other rights shall provide no more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
5. 01M After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Comments:

1. kwalker 1/24/2003 Capacity of Well
In looking at the field exam, examiner used static water level plus 20 feet for the lift in his theoretical calc. I called the permit holder to find out the depth of the pump and he believes it is around 80 feet. I asked him if he had a pump curve and he did not. I asked him if he knew about how many inches of water the well pumped and he said around 100 inches. The new theoretical calc, using 60 feet of lift, came up to 2.15 cfs. This is fairly consistent with the permit holders estimate.
