

WESTON CREEK IRRIGATION
company minutes JUNE 1, 1960

Weston, Idaho

June 26, 1960

According to the instructions given at the annual meeting by the stock holders a special meeting was called for the purpose of reporting on the test hold for the well that had been drilled. The purpose of the meeting was to see what the stockholders wanted to do with the test hold.

There were 1198 shares of stock present and the President Richard Lemmon was in charge of the meeting.

Mr. Gardner the well driller stated that a 1 1/4" pipe would produce 2 second feet of water. This test hold is one half mile from Lew Bingham's over toward Jack King's place.

The geologist of the college said to go down 200 feet. If this were the case the well would cost \$15 a foot for a 1 1/4 inch casing; \$18 if a 1 3/8 inch casing were to be used. In other words approximately \$3,000 for the well, and a 5 horse power motor.

Ralphs said that the well should be tested first, and the tester would cost \$150 and \$125 to pump it for 10 hours; which would make a total cost of \$275, for this test.

If a diesel engine pump were bought for a well it would cost \$4,200.

The Utah Power and Light Company wants \$7,750 before doing any work, and a guarantee of \$750 at first. We would then get a rebate of \$250 a year for five years. It will cost \$500 for five years guarantee for electricity used. If this were started immediately it would take at least 45 days to complete the job, which in reality would be too late to help you this year.

A new 440 voltage line would have to be run from Lee Schvanveldt's place out to the well.

Someone wanted to know if the well would drain the town springs? The well digger, Mr. Gardner said it would not bother the lower springs.

According to the Koller boys they pay \$1,000 a year for electricity to pump their well.

So far the test well started on has cost \$208.

A motion was made by Douglas Bergeson that we do not go into developing a well at this time. According to our prospects, and go to the expense of putting in an expensive line, but let the individuals develop their own wells. Seconded by Vernell Mickelsen.

An amendment was made to this motion by Dale Mc Kay, that we let the individuals to ahead and develop their wells and pay for the power lines; or make more test wells to find our water supply.

The amendment was rejected by the author of the motion--
after the discussion.

If the Weston Creek Irrigation Company would put in the
power line for their wells, then the individuals could hook onto
it, without paying anything on the installing of such a line. This
seemed unfair to most of the people, in that the Company would
not want to pay for someone else using the line.

The secret ballot vote was taken on the above motion and
proved that 55 votes were for it, and 1142 were against it.
The motion was lost.

Dale Mc Kay made a motion that we dig more test holes to
get a larger supply of water, and have a better knowledge of the
water bed under ground, and the supply. At first let us try
two more test holes.

Clyde Nielsen seconded the motion.

Since there was not discussion or voting Dale Mc Kay withdrew
his motion.

Vernell Meckelsen made a motion that the meeting be adjourned.
Seconded by Eugene Fredrickson. Motion carried.

Meeting adjourned at 9:45.

George E. Mylroie
Secretary

Weston, Idaho

May 26, 1960

There will be a Special meeting of the Stockholders of The Weston
Creek Irrigation Company June 1, 1960, at 8 p. m. in the Weston
Ward Chapel.

The test hole for the well has been drilled and we have good pros-
pects. The purpose of the meeting is to find out if the stockholders
wish the Directors to further develop this test hole.

George E. Mylroie,
Secretary

LEGAL PUBLICATIONS

NOTICE OF SPRING ASSESSMENT

Of the Weston Creek Irrigation Company for 1960

Notice is hereby given that at a meeting duly called and held on the 8th day of April, 1960, by the Board of Directors of the Weston Creek Irrigation Company, an assessment of 1.35 per share was levied on all Capital stock of said Weston Creek Irrigation Company, due and payable to the Secretary and Treasurer of said Company on or before the 4th day of June, 1960. Any stock on which said assessment is not paid on said due date will be delinquent and will be advertised for sale at public auction and unless payment is made before, will be sold on the 2nd day of July, 1960, at 2 o'clock p. m. of said day to pay the delinquent assessment together with costs of advertising and expense of sale.

Said assessment is for the purpose of cleaning ditches and repairing or constructing head-gates and making any other improvements in the system deemed necessary by the Board of Directors of the Company. Stockholders will be given credit for any labor done on the system by themselves or their hired hands under the supervision of the directors. Boys under 14 years of age not hired. Bring Social Sec. No. Idaho. Mail your check to Secretary at Box 21, Franklin, Idaho. The Secretary will be at Lott's store June 1, 10 a. m. to 6 p. m.

GEORGE E. MYLROIE, Sec.-Treas.
May 12-19-26, June 30

Weston, Idaho

May 26, 1960

The Meeting of the Board of Directors was called by the President, to report on the drilling of the test hole for a well.

All Directors were present. Richard Lemmon reported that we had good possibilities of getting 2, 3 or even 4 second feet from the well, if a 14 inch pipe was put down. The water table is 71 feet down, and found 60 feet of fine gravel, below this. Probably 115 feet well would be deep enough.

The U. S. U. Geologist was present at the meeting and made a few suggestions. Especially that he believed if we had bids on this work we might be able to get estimates ranging from \$7 to \$10 a foot, which should be plenty. In Salt Lake County the price is \$5 a foot.

Some talk was made of drilling a second test hole, and then it was believed best to go ahead and see what this well would produce.

Motion was made by Vereen Bingham and seconded by Norman Fannesbeck to assign each director some thing to find out pertaining to the well, and cost. Motion carried.

Vereen Bingham to call the Utah Power and Ligh Company to find out the cost of electricity for pumping. The Geologist was to call Norman Fannesbeck and give him the names of some well diggers and the directors were to meet at Weston at Noon the next day.

Herbert Williams made a motion that we adjourn. Seconded by Eldon Leavitt. Motion carried.

Adjourned at 9 P. M.

April 28, 1960

April 9, 1960 - Dale McKay made
A motion to check with
Charles Gardner about drilling
A well...

Again the original agreement between Earl Butters, his Wife Gladys Butters, The Village of Weston, and the Weston Creek Irrigation Company was read.

Motion by Eldon Leavitt that the Creek Company finish the job already started on the spill way and give the Rider a few days consideration before signing it.

Seconded by Norman Fannesbeck. One vote for and two against. Motion lost on account of the vote.

Motion by Dale Mc Kay that we carry out the request of the stockholders vote at the last annual meeting (1960), by doing the necessary work, and spill the water for East and South Fields there.

Motion was lost for want of a second.

Motion by Vereen Bingham that we give the Rider further consideration and finish the work started on the spill way and spill the water there. This motion was lost for the want of a second.

Vereen Bingham withdrew his motion in preference to that one of Dale Mc Kay's. Which reads as follows: that the Board of Directors carry out the wishes of the stockholders as given or expressed in the last annual meeting by doing the necessary repair work on the ditch and spill way; and spill the East and South fields water there.

Seconded by Vereen Bingham. Four voted for it, one against it and Herbert Williams did not vote. Motion carried.

Richard Lemmon reported on his assignment to see Mr. Gardner in Malad about drilling a test hole for a well. Mr. Gardner thought that it might cost approximately between \$700 and \$900, and that it would be about two weeks before he could be here.

It was suggested that the best place for a test hole would be at the Johnny Binggeli place, and that Herbert Williams see about the price of a piece of land near the road would cost for such a thing.

Norman Fannesbeck was chosen to get a competent geologist from U. S. U in Logan, and go over the land for a good spot; after the motion had been made by Norman Fannesbeck and seconded by Eldon Leavitt. Motion carried.

Vereen Bingham made a motion that we adjourn. Seconded by Eldon Leavitt. Motion carried.

We adjourned at 10 P. M.

JACK MADE MOTION TO LOOK FOR A WELL. JACK KING,
ELDON LEAVITT, AND HERBERT WILLIAMS TO LOOK INTO.

WESTON IRRIGATION COMPANY
Annual Meeting

Feb. 15, 1960

The Annual meeting of the Weston Creek Irrigation Company was called to order by the President, Dale F. Mc Kay at 11 A. M. in room 14 of the Weston Church building, at Weston, Franklin County, Idaho.

A count of the number of shares of stock and proxies represented at the meeting was made, which totaled 1797.68. It was decided that we could go ahead with the meeting as there was more than 50% of the stock represented.

The notice of the annual meeting was read; then the minutes of the last annual meeting (1959) were read and approved. A motion was made by Douglas Bergeson that the minutes be accepted as read. Seconded by Eldon Leavitt. Motion carried.

The financial report was read. A motion was made by Richard Lemmon that the financial report be accepted. Seconded by John F. Reeder. Motion carried.

Dale F. Mc Kay discussed the loss of water in regards to the two ditches that were under consideration of being changed. It was mentioned that the Mc Gulloch ditch was the most expensive one—but because it was the longest, and the water loss was high.

The president spoke about the damage of frost in the canyon. Due to the small amount of water coming over the cement in the canyon, it was not enough to keep it from freezing, and it looks as though the block may have to be replaced.

Felix Feller reported that Darwin had an engineer check a location for a dam, about 80 rods below where Stink Creek crosses the road at Earl Anderson's. There is enough water for a good dam here and it should be considered.

Eldon Leavitt and Dale Mc Kay told that they had an engineer study the possibility of a dam site below the town of Weston. The engineer told them that the ground was quite gravelly and he could not tell exactly how far back a person would have to go or how deep for the footings. But there was a good location for a reservoir of 2000 Acre feet in one place and of 4,000 Acrefeet in another place. However there would be quite a loss from evaporation.
