During licensing of related rights 63-33112 thru 63-33114 (same system different lots), determined not ideal to maintain combined use limit condition on permit. The preferable method to deal with this permit condition is to take the total rate authorized, 0.32 cfs, into account with the total acres irrigated, 11 acres, under the four permits recognizing a maximum rate per acre (0.029 cfs/ac) allowance. Therefore, the license drafted by Danie Merriman, sent to owner 8/9/16, is amended to limit the total diversion rate to 0.08 cfs (2.9 ac x 0.029 cfs/ac) and remove the combined use condition. Also, the draft license is being amended to exclude the condition limiting construction to four wells under the four permits (only one well constructed and no administrative reason to maintain limitation) and the POU lot and block information. The owner requested flexibility to move the license to any lots within the 40 acre-tract, which statutes allow.

Well upgrade fee received 9/8/16 (receipt ID W044604) for pod well D0069038.
