1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. 4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This rental does not grant any right-of-way or easement to use the diversion works or conveyance works of another party.
10. Rental of rights 2-7287 and 2-10450 when combined with right 2-7039 shall not exceed a total diversion rate of 10.84 cfs, a total annual maximum diversion volume of 2910.0 af at the field headgate, and the irrigation of 582.0 acres.

FROM THE BOARD'S WATER SUPPLY BANKApplicant Name: Dale Hooley

Is this application being submitted with a lease application as a lease/rental package?

Yes ☐ No ☒

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

Since the water will be pumped and piped to the property, applicants only need 3 afa/ac at the field headgate rather than the standard 4 afa/ac.

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

ATTACHMENT 3A

The lands proposed for rental water were previously irrigated under water right 2-7039. Applicant recently transferred water from these acres to pivot lands just 3 miles west that they own and irrigate from a separate system. The reason for the transfer was to allow early season diversion (3/15) on their west pivot lands without subordinating conditions, which right 2-7039 provides. Before the transfer, the other lands were irrigated with rented water right 2-10471 that has an April 1 start date.

While seeking a more permanent water right solution, applicant now needs rental water to cover 95 acres without water right as a result of the transfer. Snake River water senior to the Murphy Gauge minimum stream flow rights that provides early season diversion (3/1 or 3/15) without subordinating conditions is preferred, however applicant will make due with what's available.

MEMORANDUM FOR AGREEMENT #310

To: Water Right(s) 2-7287 & 2-10450
From: Mary Condon
Date: February 27, 2019
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Application to rent for irrigation received on December 3, 2018 for the 2019 thru up to the 2023 seasons. No water rights requested. Rental will cover 95 acres previously under 2-7039 before transfer 82209, which moved 141 acres to another location 3 miles west. The rental would be from the existing POD for 2-7039.

AUTHORITY TO FILE: Application is signed by Dale Hooley for Dale Hooley, and Lori Graves of SPF Engineering for his consultant. Rental POU parcel taxlot data in the name of Dale Hooley, and right 2-7039 to be used in combination with the rental also in the name of Dale and Diana Hooley. No concerns with authority to file.
POD is not on their land, under BLM. Rental will not give access to POD across private or Federal lands.

WATER RIGHT VALIDITY: Water right 2- 7287 was licensed in 1991 and used until it was placed in its entirety in the bank from 2003 to 2011. 2013 and 2015 Imagery shows 80 to 85 acres of irrigation. The entire right is for 100 acres. Application to lease a portion equaling 24.4 acres in 2016 states it was used fully between leases. 2016 WMIS records have 258.61 af, as an estimate due to install during the irrigation season. Then in 2017, it was entirely placed in the bank, again in 2018, idling of land use verified during site visit in WMIS records. Under the current contract from 2019-2021. No concerns of validity of this right.

Water Right 2-10450 was decreed in 2008, and has been in the bank since 1991. No concerns of validity.

INJURY TO OTHER WATER RIGHTS: Rented rights are just upstream from the rental POD. Rental POU previously had additional acres before transfer 82209 moved 141 acres elsewhere. This rental will cover 95 of those acres. Injury to other water rights is not expected through this rental.

ENLARGEMENT OF USE: Right 2-7287 is closest upstream from rental POD, while 2-10450 is about 10 miles upstream. Rented rights when combined with right 2-7039 on rental pou are at .02 cfs/acre and 5 af/acre, consistent with current right 2-7039 to avoid enlargement of these rights. No other water rights on rental POU, or out of rental POD. Enlargement of use from this rental is not expected.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to Water District # 02, SOU – 3/15 – 11/15, HG – 4.

Water right 2-7287 same as Rental PD; Water right 2-10450 SOU – 4/1 – 10/31.

Request for comment to Western Region manager and Watermaster via email on 2/28/2019.
