N/A	N/A	N/A	N/A	N/A	N/A	N/A

2. Measurements: Because the sprinklers are a closed system, no flow measurements were taken during the field exam.

E. FLOW CALCULATIONS

 X Additional Computation Sheets Attached

Measured Method: Pump curve for the pump was found. The estimated pump capacity is 83 gpm or 0.19 cfs. Only 2.0 acres were developed relative to the permitted 3.0 acres. As such, the recommended rate for licensing is **0.06** cfs (0.03 cfs X 2.1 acres).

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 2.1 \text{ acres} \times 3.0 \text{ H.G.R.} = 6.3 \text{ AF}$$

$$V_{DR} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 0.06 \text{ cfs} \times 200 \text{ days} \times 1.9835 = 23.8 \text{ AF}$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} = \mathbf{6.3 \text{ AF}}$$

G. NARRATIVE/REMARKS/COMMENTS

System Description:

Water from the well is pumped into a pressurized irrigation system. Sprinklers are used to irrigate around the common areas along the stream that flow through the park and around the club house as identified on the enclosed map. The pump is set at 336' (16 sticks of 21' 2.5" galvanized pipe). The 10 Hp pump is single phase. Municipal water is currently used to water around the individual RVs.

Place of Use and Point of Diversion:

An amendment is necessary to include L5SENE and L10NWSE in Section 25 and to move the point of diversion as described above. The initial application sought low temperature geothermal (LTG), but the bottom hole temperature was only 82°. The temperature has only cooled over the years, so does not qualify as a LTG well. Therefore, the heating, recreation, recreation storage, aesthetic, aesthetic storage, and diversion to storage components will be dropped.

Season of Use:

The season of use was updated to the Department standard 04/15-10/31.

Conditions:

Conditions 046, 46B, and 46A were removed and not forwarded to licensing. The LTG condition and explanatory LTG conditions were removed and not forwarded to licensing. Condition 057 was updated to R66 and forwarded to licensing.

Have conditions of permit approval been met? X Yes No

RE: Scheduling Field Exam for Water Right Permit No. 65-13502

Dear Permit Holder:

We are planning to conduct water right examinations in the vicinity of the above-referenced permit **this season**. An examination is needed to verify the water use in order to issue a water right license.

The above-referenced permit authorizes **0.09 cfs** of **GROUND WATER** for **IRRIGATION, HEATING, RECREATION, RECREATION STORAGE, AESTHETIC, AESTHETIC STORAGE, AND DIVERSION TO STORAGE** uses. **If you have developed a beneficial use and still own the place of use property, please contact me at your earliest convenience to schedule an examination.**

If you did not develop a beneficial use of water under the permit during the beneficial use period, a license cannot be issued and the permit should be relinquished. If that use was developed, but have ceased using the water and you currently carry no interest in it, please relinquish the permit by submitting the enclosed Relinquishment of Permit form (no fee required).

Please contact me within the next thirty (30) days at (208) 334-2190 to either schedule an examination or submit a relinquishment form. If the Department does not received a response by August 31, 2018, your permit will become void. Thank you for your attention to this matter.

RE: Water Right Permit No. 65-13502

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit(s) referenced above prior to issuing water right license(s). By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

The examiner who verified your water use reported that certain elements of the permit(s) have been developed differently than described on your permit(s). Changes that do not increase the authorized use of water under the permit(s) can be requested and approved in accordance with Idaho Code § 42-211. Before license(s) can be issued, your permit(s) must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit(s):

☒ Point(s) of Diversion

☒ Place(s) of Use

☐ Other

The enclosed Application for Amendment form(s) depicts the elements of the water right(s) as they will appear on the license(s) when issued. Please review the amendment form(s) carefully. If you concur with the information presented, please sign and return the form(s) with the filing fee of \$100.00 within fourteen (14) days.

If you have any questions, please call me at (208) 334-2190.

Sincerely,

Aaron Skinner
