DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

IDWR / NORTH

1. Name of applicant(s) Girl Scouts of Eastern Washington and Northern Idaho Phone 509-747-8091
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address 1404 N ASH ST City SPOKANE
 State WA ZIP 99201 Email _____
2. Name of representative, if any _____ Phone _____
 Mailing address _____ City _____
 State _____ ZIP _____ Email _____
- a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply GROUNDWATER which is a tributary of _____
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
48N	05W	25			NE	SW	KOOTENAI	GROUNDWATER	95-97-N-009
48N	05W	25		3	NW	SE	KOOTENAI	GROUNDWATER	FUTURE WELL

5. Water will be used for the following purposes:
- Amount 0.20 CFS for DOMESTIC purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) 0.20 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. APPLICANT HAS WELL AND FUTURE WELL THAT CONNECTS TO 20,000 GAL RESERVOIR THEN DISTRUBUTED TO CAMP
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No
- e. If well is already drilled, when? 4/11/1997; drilling firm UNITED DRILLING
 well was drilled for (well owner) APPLICANT; Drilling Permit No. 95-97-N-009

For Department Use

Received by _____ Date _____ Time _____ Preliminary check by _____
 Fee \$ 100.00 Received by ja Receipt No. N1034078 Date 3-7-19

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total feet of head and proposed capacity in kW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; must complete and attach the Municipal Water Right Application Checklist.
 - Domestic; show number of households DOMESTIC USE IS FOR GIRL SCOUT CAMP
 - Other; describe fully. _____
9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
48N	05W	25				D					D		D	D		D	D		
													GL4	GL5		GL3	GL3		

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? 95-15559 RECOMMENDATION FOR IRRIGATION FROM LAKE
11. a. Who owns the property at the point of diversion? APPLICANT
- b. Who owns the land to be irrigated or place of use? APPLICANT
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____
12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. APPLICANT HAS WELL AND FUTURE WELL TO SERVE CAMP AND VISITORS DURING SUMMER AND OTHER SEASON.
13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).
14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Camp Four Echoes Water System Overview

Camp Four Echoes is a girl scout camp located on approximately 165 acres on the west side of Lake Coeur d'Alene, overlooking Windy Bay. The water system serving the camp is classified as a transient, non-community public drinking water system consisting of a single drilled well, chlorinator, chlorine contact gallery, storage capacity, and distribution lines serving 15 connections and 155 people during peak usage.

History

Beginning in 1973 the original water system design consisted of a lake pump drawing water from Lake Coeur d'Alene, filtration through a Kisco Agrigate Filter and Kisco Activated Carbon Filter, and chlorination prior to storage in a 20,000-gallon concrete storage tank riding on the system. In response to the suspected presence of giardia in 1982, a network of 5-micron cartridge filters were installed at each of the drinking water taps for further treatment. The camp also began to consider a system that would reduce the risk of a water-borne outbreak such as giardiasis.

In 1984, a new well was drilled to supply a safe source of water for the camp. However, repeated testing for coliform showed the presence of both total and fecal coliform periodically and the lake system was reactivated for the remainder of the 1984 season. Repeated testing in 1985 continued to show contamination of the well. To accept the well as a useable source, a chlorine contact pipe gallery was proposed in 1986; the Idaho Department of Environmental Quality (DEQ) approved plans submitted by Meckel Engineering for construction of the contact gallery consisting of 920 feet of 6-inch PVC to provide 30 minutes contact time. Sodium hypochlorite was then injected into the system prior to the buried chlorine contact gallery and adequate chlorine contact time was being achieved prior to the storage tank and distribution.

In July 1996 the Camp experienced an outbreak of gastroenteritis. While the investigation could not confirm drinking water to be the source of the outbreak, the assumption was made anyway due to the fact the continuous chlorinator was not functioning properly at that time and raw water samples contained both total and E.coli bacteria. This outbreak forced the Camp to continue the pursuit for a clean and safe source of water; a new well was drilled in 1997 to replace the contaminated 1984 well. The 1984 well has been officially abandoned.

Source

Drinking water for Camp Four Echoes Girl Scout Camp is currently supplied by the well drilled April 11, 1997; located approximately 200 yards south of the camp entrance on the west side of the road. The well was drilled by United Drilling to a total depth of 280 feet and constructed with a 55-foot bentonite surface seal. A well driller's report is on file with the Panhandle Health District (PHD). The 6-inch steel casing extends two feet above the surface, fitted with a watertight vented well cap, to 240 below the surface. The well is equipped with a 3-horsepower submersible pump controlled by floats in the storage tank. At the time of drilling the well produced 18 gallons per minute however current production is reportedly closer to 11 gallons per minute. The well cap is provided with a lock to protect against unauthorized entry. The well meets all required sanitary setbacks.

Pump House

The pump house is located adjacent to the well and was observed to be clean, well maintained, and secured from unwarranted entry. Adequate light, heat and floor drainage are provided. The floor drainage daylight south of the pump house. Ventilation has been added in the pump house to eliminate excess heat and moisture during the warmer months and is covered during the colder months to retain heat. Two indicator lights are provided on the outside of the pump house; one remains on and will go off if the storage capacity gets too low, and the other light comes on when the chlorine injector pump is running.

Application For Permit No. 95-17782

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the COEUR D'ALENE PRESS on 3/21/2019 and 3/28/2019. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Tammy Alleman
Administrative Assistant

Alleman, Tammy

Subject: Request for Comments for WR# 95-17782
Attachments: 95-17782 Application for Permit.pdf

Dear Interested Agencies:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced Water Right application. You can find copies of the application attached to the email and also at: <http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>.

This office can publish notice of the application as soon as the initial review is completed; therefore, your prompt response to this request is appreciated. If your agency desires to formally protest the approval of the application, you may do so after the notice is published by filing a written protest along with a \$25.00 filing fee within 10 days after final publication. The deadline for comments on the application is April 8, 2019.

Please contact the Northern Region Office at (208) 762-2800 if you have any questions regarding the application.

Thank you,

Tammy
