If a lease contract cannot be reduced sufficient to reflect the legal definition of a water right as amended through a water right split and/or water right transfer, the Board may release the water right from the Water Supply Bank.

Narrative: The Department received this application on Jan. 17, 2019. The application was signed by Tom Furrier, trustee. The applicant wishes to place 1.5 acres in the Bank. This right was decreed in 2011 and the portion offered to the Bank has been in the Bank since 2016. Forfeiture is not an issue. It does not appear the banked acres have been irrigated. Applicant asked for the rental fee to be \$850 per acre foot based on the current market rental rate as established by multiple recent lease/rental transactions recently completed. However, a resolution passed in March, 2012, by the board states that "unless otherwise agreed to between lessor and lessee and approved by the Director of the Department of Water Resources, the price for water rights rented through the Water Supply Bank shall be equal to the Nez Perce Agreement flow augmentation rate in effect at the time that the rental is made." This right is currently within WD 37.
