

MEMORANDUM

To: Water Right 35-2324A
From: Sandra Thiel
Date: August 1, 2018
Re: Proposed Transfer 82397

In November 2006, the Idaho Soil Conservation Commission, along with the USDA Farm Service Administration, issued Agreement Not to Divert Water From the Eastern Snake Plain Aquifer Water Use Contract (ANTD) to Lyle and Krista Soderquist. The ANTD included three water rights 35-2324A, 35-7897B and 35-8130. Together these rights authorized the diversion of 1,536 af. The ANTD allowed the continuing diversion of 21 af under right 35-8130. The full volume of rights 35-2324A and 35-7897B was curtailed under the ANTD.

In June 2009, the Idaho Department of Water Resources approved transfer 74978. This transfer split right 35-8130 into rights 35-13800 and 35-13801. The six authorized acres under right 35-13801 were moved to another field along with the volume of 21 af.

On March 28, 2018, Robert Harris submitted transfer 82397 on behalf of water right holders Lyle and Krista Soderquist. They propose changing the place of use and point of diversion for 6.5 acres of right 35-2324A.

The full volume of right 35-2324A was curtailed in the 2006 ANTD. It appears there is no volume remaining for transfer 82397. ANTDS are 15 year contracts. Right 35-2324A may be eligible for a transfer in 2021.
