Conditions of Approval

1. Rights 47-7170 and 47-17686 when combined shall not exceed a total diversion rate of 3.41 cfs.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
3. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
4. This right is for the use of trust water, and it is subject to review 20 years after its initial approval (date of permit approval) to re-evaluate the availability of trust water for the authorized use and to re-evaluate the public interest criteria for reallocating trust water.
5. When the minimum stream flow water rights in the Snake River at Murphy Gage are not being satisfied, the right holder shall cease diverting water for the consumptive uses authorized by this right.

RE: License Nos. 47-7169, 47-7170, 47-17686

Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources ("Department") has issued the enclosed Water Right Licenses confirming that water rights have been established in accordance with your permits. Please be sure to thoroughly review all the conditions of approval listed on your licenses. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district. Also enclosed are copies of the approved applications for amendment.

The licenses are PRELIMINARY ORDERS issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). They can and will become final orders without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov.

If you have any questions concerning the enclosed information, please contact me at (208) 736-3033.

Sincerely,

Corey Skinner
Southern Regional Manager

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right Permit No. 47-17686

Dear Permit Holder:

The Department of Water Resources is reviewing the permits referenced above prior to issuing water right licenses. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

The examiner who verified your water use reported that certain elements of the permits have been developed differently than described on your permits. Changes that do not increase the authorized use of water under the permits can be requested and approved in accordance with Section 42-211, Idaho Code. Before licenses can be issued, your permits must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit(s):

☒ **Points of Diversion** (47-7170; 47-17686)

☒ **Places of Use** (47-7169; 47-17686)

☐ **Other**

The enclosed Application for Amendment forms depicts the elements of the water rights as they will appear on the licenses when issued. Please review the amendment forms carefully. If you concur with the information presented, please sign and return the forms with the \$300.00 filing fee (three license amendments at \$100.00 each) within 14 days.

If you have any questions, please call me at (208) 733-3033.

Russ,

Thanks for the update. Bill and I will start heading down this path. It might take a couple of weeks before we can get the licensing amendments prepared. Last week I had the opportunity to visit with Karen Province about this matter. I believe she is associated with the "other 1/3" of the ownership of the lands. I am copying her on this e-mail also.

Hi Corey,

We have discussed these options with Craig. Michelle wants to go with option 3. If I understand this it will add more irrigated acres to the picture. Michelle Fletcher is the trustee of Ed Yragui's trust that owns an undivided 2/3 of these parcels. Please prepare the documents to proceed from the permit process to the water right process. Thank you for your attention to this matter.

Russ

>>> "Skinner, Corey" <Corey.Skinner@idwr.idaho.gov> 1/9/2019 11:44 AM >>>

Craig,

Here are the facts that IDWR has gathered...

- Permit 47-7169 for 4.0 cfs and 200 acres in Section in Section 26
- Permit 47-7170 for 4.0 cfs and 200 acres in Section 23.
- The well for 47-7169 was measured at 4.45 cfs
- The well for 47-7170 was measured at 3.41 cfs.
- The Yragui family developed two pivots in Section 26 and two pivots in Section 23. However, they only own a portion of the land where the two pivots were developed in Section 26. They do own all of the land where the two pivots were developed in Section 23.

We discussed possible options....

- License 47-7169 for 4.0 cfs and roughly 170 acres + or - in Section 26 on Yragui property in Section 26.
- License 47-7170 for 3.41 cfs for 200 acres in Section 23.

Or

- License 47-7169 for 4.0 cfs for 200 acres in a roughly 280 acre permissible place of use in Section 26 (note that this would place some of the license on property not owned by the Yragui family potentially decreasing their portion of the resulting license).
- License 47-7170 for 3.41 cfs for 200 acres in a roughly 280 acre permissible place of use in Section 23.

Or

Moving approximately 30 acres (200 – 170) of the 47-7169 acres from Section 26 to Section 23 via a licensing amendment resulting in the following...

- License a portion of 47-7169 for approximately 3.4 cfs and roughly 170 acres + or - in Section 26 on Yragui property in Section 26. (this would be from the well in Section 26)
- Licenses a portion of 47-7169 for approximately 30 acres in Section 23 (from the well in Section 23) plus licensing 47-7170 for 3.41 cfs for 200 acres in Section 23. This would result in a total of 3.41 cfs (Section 23 well capacity) for an approximate total of 230 acres in Section 23.

Note all of the options above would require a \$100.00 licensing amendment for each license to correct well locations and possibly adjust acre locations. (First option \$200.00 total, second option \$200.00 total, third option \$300.00 total). These licensing amendments would have to be signed by a representative of the Ed Yragui properties.

Let me know if you want to discuss further,

Corey
