

State of Idaho
Department of Water Resources
Permit to Appropriate Water
No. 78-12502

Priority: August 10, 2018

Maximum Diversion Rate: 0.02 CFS

This is to certify that

JUDY A CARSON CARROLL And
KERRY M CARROLL
PO BOX 212
POLLOCK ID 83547

has applied for a permit to appropriate water from:

Source : LITTLE SALMON RIVER

Tributary: SALMON RIVER

and a permit is APPROVED for development of water as follows:

Beneficial Use

IRRIGATION

Period of Use

02/15 to 11/30

Rate of Diversion

0.02 CFS

Location of Point(s) of Diversion

LITTLE SALMON RIVER NE¼ SE¼, Sec. 20, Twp 23N, Rge 01E, B.M. IDAHO County

Place of Use: IRRIGATION

Twp	Rng	Sec	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
23N	01E	20													0.6				0.6

Total Acres: 0.6

Conditions of Approval

1. Proof of application of water to beneficial use shall be submitted on or before **March 1, 2020**.
2. Subject to all prior water rights.
3. This right when combined with all other rights shall provide no more than 0.03 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
4. Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening and/or fish passage requirements of the Idaho Department of Fish and Game.
5. Construction of water diversion works shall not impede fish and boat passage.
6. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.

State of Idaho
Department of Water Resources
Permit to Appropriate Water
No. 78-12502

This permit is issued pursuant to the provisions of Idaho Code § 42-204.

Signed this 21st day of February, 2019.

NICK MILLER
Manager, IDWR Western Region

RE: Permit No. 78-12502

Permit Approval Notice

Dear Permit Holders:

The Department of Water Resources ("Department") has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review all the conditions of approval listed on your permit. The conditions include requirements that you must accomplish, such as timely submittal of proof of beneficial use or installation of a measuring device, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district. Failure to comply with the conditions of approval may result in your permit lapsing or being canceled.

The permit is a PRELIMINARY ORDER issued pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

The final step in the water right process is issuance of a water right license. To receive a water right license, you must divert and use water to the full extent intended and submit a *Statement of Completion for Submitting Proof of Beneficial Use* ("Proof") by the date shown in condition no. 1 of your permit. The Department will send you a *Proof Due Notice* approximately 60 days prior to the date listed in condition no. 1 of your permit. If you have already diverted and used water to the full extent intended, you may complete and submit the enclosed Proof form immediately.

You may also require approvals from other Department programs, such as Ground Water Protection, Safety of Dams, or Stream Channel Protection, to accomplish your proposed development. Please call or visit any Department office or see the Department's website at idwr.idaho.gov for more information about these programs.

Also, please note that permit holders are required to report any change of ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Forms to assign ownership or update your address are available from any office of the Department or on the Department's website.

If you have any questions concerning the enclosed information, please contact me at (208) 334-2190.

Sincerely,

Anna Kaiser

Administrative Assistant 1

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

TO: Application No. 78-12502

FROM: Justin Shearer

DATE: 2/13/2019

RE: Salmon-Clearwater Processing, Basins 77-79 Western Region

The application proposes to divert water from the Little Salmon River using a Red Lion 2 hp pump to irrigate of 0.6 acres for fruit trees, flowers, and lawn.

The site is located in NE Pollock on the East side of Old Pollock Rd.

Wild & Scenic River (WSR) Processing

General Information - WSR processing applies to portions of Bs 77 and 78 but not to Bs 79. It is rarely expected in Bs 78 since WSR right 78-11961 covers federal land upstream from the Rapid River Fish Hatchery slightly southwest of Riggins.¹

Typically WSR issues would be in Bs 77 upstream from Long Tom Bar on the Salmon River, WSR right 77-11941.² This also incorporates the entire Middle Fork Salmon River drainage, MSR right 77-13844.³

WSR processing is required for any source/diversion upstream from any WSR right. This applies to all sources and uses unless the applicant shows the source is not hydraulically connected to any WSR rights.

Specific Information for this Application - WSR processing is not required because the proposed source/diversion are downstream from any WSR rights.

Minimum Streamflow Rights (MSF)

General Information - MSF analysis applies to all surface water upstream⁴ from any MSF rights. Basins 77-79 have various MSF rights that might affect applications. By agreement with SO regarding these basins, specific MSF conditions of approval are not necessary provided the reviewer checks MSF issues and documents the file with the results (7/8/09 telephone conference).

Downstream MSF right 3-8 on the Snake River⁵ is not subordinate to “future dcmi” uses or “future non-dcmi (with cfs limits)” uses. Downstream Salmon River MSF right 79-14119⁶ is subordinated to future dcmi uses but not to future non-dcmi uses.

¹ POD = T23N-R1W-S12.

² POD = T25N-R5E-S31.

³ POD = T23N-R16E-S33.

⁴ Shallow ground water tributary to surface water might involve MSF issues under conjunctive management thinking. Discuss with your supervisor if this comes up.

⁵ POD = T31N-R5W-S10.

⁶ From mouth of river T29N-R4W-S14 upstream thru about Shepp Ranch T24N-R6E-S12.

All Basin 77-79 MSF rights upstream from the ending point of 79-14119 (mouth of Salmon River) include subordination to future dcmi uses. Most of those upstream MSF rights are also subordinate to various amounts of future non-dcmi uses. None of the future non-dcmi cfs rates have been exceeded yet by new approvals. Further MSF analysis is generally not needed until a specific future non-dcmi cfs rate is exceeded.

Because the review memo extensively covers WSR and MSF issues, SO Planning Bureau comments are not needed yet (prior agreement with SO). Planning will be contacted for comments during the legal notice process as a precaution.

Specific Information for this Application –MSF analysis is required for the proposed source and use upstream from MSF rights 3-8 and 79-14119.

This application also involves MSF right 79-14124, 78-12362

This leads to the following MSF conclusions for this application:

- Senior MSF right 3-8 will not be subordinated to the proposed use(s).
- Senior MSF right 79-14119 will not be subordinated to the proposed non-dcmi use.
- Senior MSF right 79-14124 will be subordinated to the proposed dcmi and non-dcmi use(s).
- Senior MSF right 78-12362 will be subordinated to the proposed dcmi and non-dcmi use(s).

Discussion

Effect on Existing Water Rights: The approval of this application is not anticipated to cause injury or have a negative effect on existing water rights.

Sufficiency of Water Supply: Sufficiency of water supply is not of concern.

Good Faith, Delay or Speculative Purposes: There is no evidence to suggest that the Carroll's application was made in bad faith, or for speculative purposes.

Financial Resources:

Additional information is unnecessary because the applicant estimated the project will cost less than \$5000.

Local Public Interest:

IDFG requested screening at the POD intake to protect anadromous waters and DEQ requests that the project incorporate construction best management practices (BMP's) to assist in the protection of Idaho's water resources.

Conditions of Approval

In addition to typical standard conditions (004, 121 etc.), use the following standard, modified &/or unique conditions for Basins 77-79.

- **Recreational Stretch-** Construction of water diversion works shall not impede fish and boat passage.

Per IDFG comments, use the following:

- **029 standard** - Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening and/or fish passage requirements of the Idaho Department of Fish and Game.
