H. NARRATIVE/REMARKS/COMMENTS

Debra Winslow ("permit holder") filed an application for permit on September 6, 2017 for domestic use and stockwater for 10 head of mixed stock. The permit authorized the proposed diversion of ground water through an existing well on the permit holder's property.

The permit holder filed the Statement of Completion for Submitting Proof of Beneficial Use ("Statement of Completion") on October 5, 2018. Because the Statement of Completion was incomplete, the Department requested additional information on October 10, 2018 regarding the source (item 4), the extent of use (item 5), and the diversion rate (item 6). The applicant submitted an amended Statement of Completion on October 17, 2018.

The amended Statement of Completion did not include information on the number of stock put to beneficial use. On January 23, 2019, I contacted the permit holder by phone. The permit holder stated that no stock have been put to beneficial use during the development period for this water right. The authorization for stockwater is removed from the license.

The tax parcel boundaries of the permit holder's property were used as the boundaries for the place of use, in order to include the uses authorized under the definition of domestic use (§42-111).

Conditions limiting the water right to 1 home, and ½ acre of irrigation are carried forward to license. All other conditions were removed.

Have conditions of permit approval been met?

☒ Yes ☐ No
