Item 6. Application Explanation:

Water rights 2-2156, 2-2245A, 2-7055, 2-7112A, 2-10318 and 2-10562 are diverted from the same point of diversion and used in an integrated irrigation system. The first five rights are owned by A. Clay and Jacoba Atkins. Water right 2-10562 is a split off of 2-2245A for property the Atkins deeded their son, who lives in Kentucky. All the rights are part of the same farming operation. The property has been leased out since A. Atkins has been in poor health and unable to manage the property. The irrigation place of use has changed over time due to the installation of pivots resulting in a more efficient irrigation system and less acres irrigated. The Atkins are filing the accompanying transfer application proposing a permissible place for the water rights to reflect the current integrated irrigation system.

The applicants would like to protect the acres no longer irrigated. All the water rights (except 2-10318) were decreed in 2012. Water right 2-10318 was decreed in 2009 and was granted an approved *Extension of Time to Avoid Forfeiture* in 2016, protecting the right until 7/1/2020. Because the rights are subject to change (as proposed on the accompanying transfer application), rather than filing a water bank lease application on each right as currently recorded, Clay Webster suggested filing *Extensions of Time to Avoid Forfeiture*, as was done for associated water right 2-10318, to protect the acres subject to forfeiture while the transfer is processed. Once the transfer is approved, water bank lease applications can be filed accordingly.

1. Rights 2-2156, 2-2245A, 2-2245B, 2-2298, 2-2355, 2-2356, 2-2376, 2-7055, 2-7071, 2-7112A and 2-7112B when combined shall not exceed a total diversion rate of 43.5 cfs.
2. Rights 2-2156, 2-2245A, 2-2245B, 2-2298, 2-2355, 2-2356, 2-2376, 2-7055, 2-7071, 2-7112B, 2-7182 and 2-7222 are also diverted through the point of diversion described above.
3. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
4. S47 The use of water for irrigation under this right may begin as early as March 1 provided other elements of the right are not exceeded. The use of water before March 15 under this remark is subordinate to all water rights having no subordinated early irrigation use and a priority date earlier than the date a partial decree is entered for this right.

Subject: Application for Transfer, Extension Applications to Avoid Forfeiture (5)

Dear Angie,

Enclosed on behalf of A. Clay and Jacoba Atkins, is an *Application for Transfer* proposing a permissible place of use for six Snake River water rights, all diverted from the same pump station. One of the water rights (2-10562) is owned by their son, John Atkins. John's transfer authorization is included as Attachment 3. Also included are Extensions of Time to Avoid Water Right Forfeiture for five of the six water rights that were decreed in 2012. Water right 2-10318 was decreed in 2009 and is protected until 2020 based on an extension application previously approved by the Department. Please see the explanation attached to the extension applications for further details.

Check No. 13993 for \$2,720 is enclosed for the filing fees (\$2,220 for the transfer and \$500 for the extensions). Thank you very much for your consideration and assistance in this matter. Please call me if you have any questions.

Sincerely,
