☐ ☒ currently leased to the Water Supply Bank,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

Portions of rights 31-2465 and 31-2380 have been in the Water Supply Bank and have been rented annually. They were released from the Bank this year. Other portions proposed to be transferred have been irrigated within the last 5 years.

Eastern Snake Plain Aquifer Modeling Analysis for 31-2380 and 31-2465

L2 LTD Partnership and L3 LTD Partnership

The Applicant proposes to transfer portions of water rights from three water rights to an existing combined system of five wells. Figure 1 shows the wells within the model grid.

The TO Well location is a centroid of the five existing points of diversion of water right 31-11989, or the proposed points of diversion for the transfer. Since the point of diversion does not change for water right 31-11989, the quantities proposed to be transferred from this right are not included in the modeling scenario. Only water rights 31-2380 and 31-2465 are included. Total volume expected to be modeled at the TO Well is 17.2 afa, or 5.7 af/trimester.

FROM 1 Well is a shared point of diversion for water rights 31-2380 and 31-2465. Total volume expected to be modeled at the FROM 1 Well includes 13.3 afa from 31-2380 and 3.8 afa from 31-2465 for a total of 17.2 afa, or 5.7 af/trimester. Both water right priorities fall within the same timestep of Winter 1960.

Figures 2-4 include excerpts of the modeling scenario. **Results do not exceed IDWR *de minimus* thresholds.**

Re: Companion Transfer Applications for L1 LTD Partnership, L2 LTD Partnership, and L3 LTD Partnership

Dear IDWR,

Please find enclosed four transfer applications on behalf of L1 LTD Partnership, L2 LTD Partnership, or L3 LTD Partnership. The intent of these transfers is to retire corners and reconfigure acres to allow for installation of mini pivots. This requires some redistribution of water rights between the three entities' properties. Attached to each transfer that includes multiple entities is an authorization letter signed by all three entities allowing the proposed changes. Lien holder letters have also been provided where required.

The portions of water rights 31-2465 and 31-2380 included in these transfers have been leased to the Water Supply Bank, and rented each year to other users. They were released from the Bank this summer and will be available for diversion again beginning in the 2019 season.

Table 1 below shows a summary and correlation between the acres proposed to be transferred under all four transfer applications. Water rights 31-12004 and 31-12006 have combined use limitations.

Table 1. Summary of Transfers

Water Right No.: Owner:	31-2465			31-2380			31-12004*			31-12006*			31-11989			Total Trans cfs

Transfer B	10.4	0.16	36.4													0.16
Transfer C				3.5	0.04	12.3	2.9	0.04	10.3	5.2	0.03	7.9				0.11

Transfers A and B simply propose to remove corners from water right 31-2465 for use at another location.

Transfer C proposes to first correct ownership of Rights 31-12004 and 31-12006. It appears that in a past transfer involving numerous water rights, these two rights were erroneously included in an ownership change. The deeds submitted with the transfer application (which can be found in the backfile of water right 31-2340) described a property very close in description, resulting in these two rights being changed into the name of L3 LTD Partnership. However, the property has never been owned by L3 LTD partnership. Deeds have been attached to this application to show that the property should be in the name of L1 LTD Partnership.

The remaining acres under water rights 31-12004 and 31-12006 do not correlate exactly to the place of use shapefile available from IDWR. Swing arms and end guns have been removed from the large pivot and mini pivots have been installed in corners. The acres irrigated within the QQs remains unchanged. A shapefile can be provided to update IDWRs shapefile for the actual irrigated acres under the pivots upon request (for the remaining portion of these rights).

Transfer D proposes to transfer acres from 31-2465 and 31-2380, which are included in Transfers A and B, or C. For Right 31-2380, the total acres to be transferred was determined by evaluating the acres that would remain under irrigation and subtracting that amount from the total water right place of use. Then the amount transferred under Transfer C was subtracted, leaving 3.8 acres available for transfer. This method was preferred since the measured acres in corners plus the remaining irrigation totaled more than the water right allowed.

Also in Transfer D, it is proposed to remove the full amount of 31-11989 to be relocated. The areas under this water right have been developed into farm facilities and will no longer be irrigated. The points of diversion will not change.

A check for filing fees is also enclosed, including the \$200 filing fee per transfer and an additional \$50 ownership change fee for Transfer C.

Thank you,

Kristin Moore
