Attachment to form 211 part #5 (narrative) for Harry Crawford

We propose to add to our point of diversion from the Lower Burnett Heading (which requires a checking up of the entire river, due to headgate placement, causing an additional river shrink of 450 inches per day as evidenced by calculations done by previous Watermaster Roger Toten) to the Crawford Heading (which requires no river checking and thus zero river shrink). This will result in not only a cost, time and hazardous job saving for the Big Lost River Irrigation District but also benefit all decree right holders by greater river longevity and storage right holders by greater delivery volumes, which are calculated using river shrink.

The move is approximately 1 mile (5800 feet) down stream, with only one 0.23 CFS pump diversion (34-178B, James Campbell) between, according to your records. This move will not only benefit us but also the patrons of the irrigation district, the residents of the Lost River Valley and the State of Idaho through greater conservation of our water resources.

Thank you for your time considering our application.
