

MEMORANDUM

TO: Water rights 63-32330 & 63-31288 files
FROM: Cody Parker
RE: 63-32330 shape correction
DATE: January 4, 2019

Water right 63-31288 is a decreed right split from parent 63-3597P. Right 63-32330 is another decreed right. It was split from 63-32055 which in turn was split from 63-31287. Rights 63-31288 and 63-31287 represent the entirety of 63-3597P. A map located in the backfile for 63-32055 (attached with this memo) shows that 63-32055 and 63-31288 do not overlap. Therefore, 63-32330 (a child right of 63-32055) should not overlap with 63-31288. However, our current shapes show that these two do overlap. It appears that the wrong property was excluded from 63-32330 when the shape was updated last. I have corrected the shapefile for 63-32330 by removing the shape for 63-31288 and adding the adjacent land to the east which was erroneously excluded when the shape was updated.

An aerial photograph of a landscape, possibly a wetland or agricultural area, overlaid with a grid. The grid is composed of rectangular cells. Most cells are colored red, blue, or white. One cell, located in the upper right quadrant, is highlighted with green diagonal hatching. A black line, possibly a road or a boundary, runs diagonally across the upper left portion of the grid. The text "SHAPE FILE FOR 63-32055" and "FOUND IN AJ TRANSFER SHAPES FILE" is printed in white on a black background in the lower left quadrant.
