10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? Water rights 22-7091, 22-7115, 22-13454 and 22-13670 share the same 378-acre place of use.

- Who owns the property at the point of diversion? Applicant
- Who owns the land to be irrigated or place of use? Applicant
- If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. This application will allow us to divert ground water from our irrigation well at a higher rate. To mitigate for the additional water diverted under this right, water rights 22-7091, 22-7115 and 22-13454 from Lyons Creek will be held unused. This application does not seek any additional acres or additional volume beyond those listed on ground water right 22-13670. We are only seeking additional diversion rate.

13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

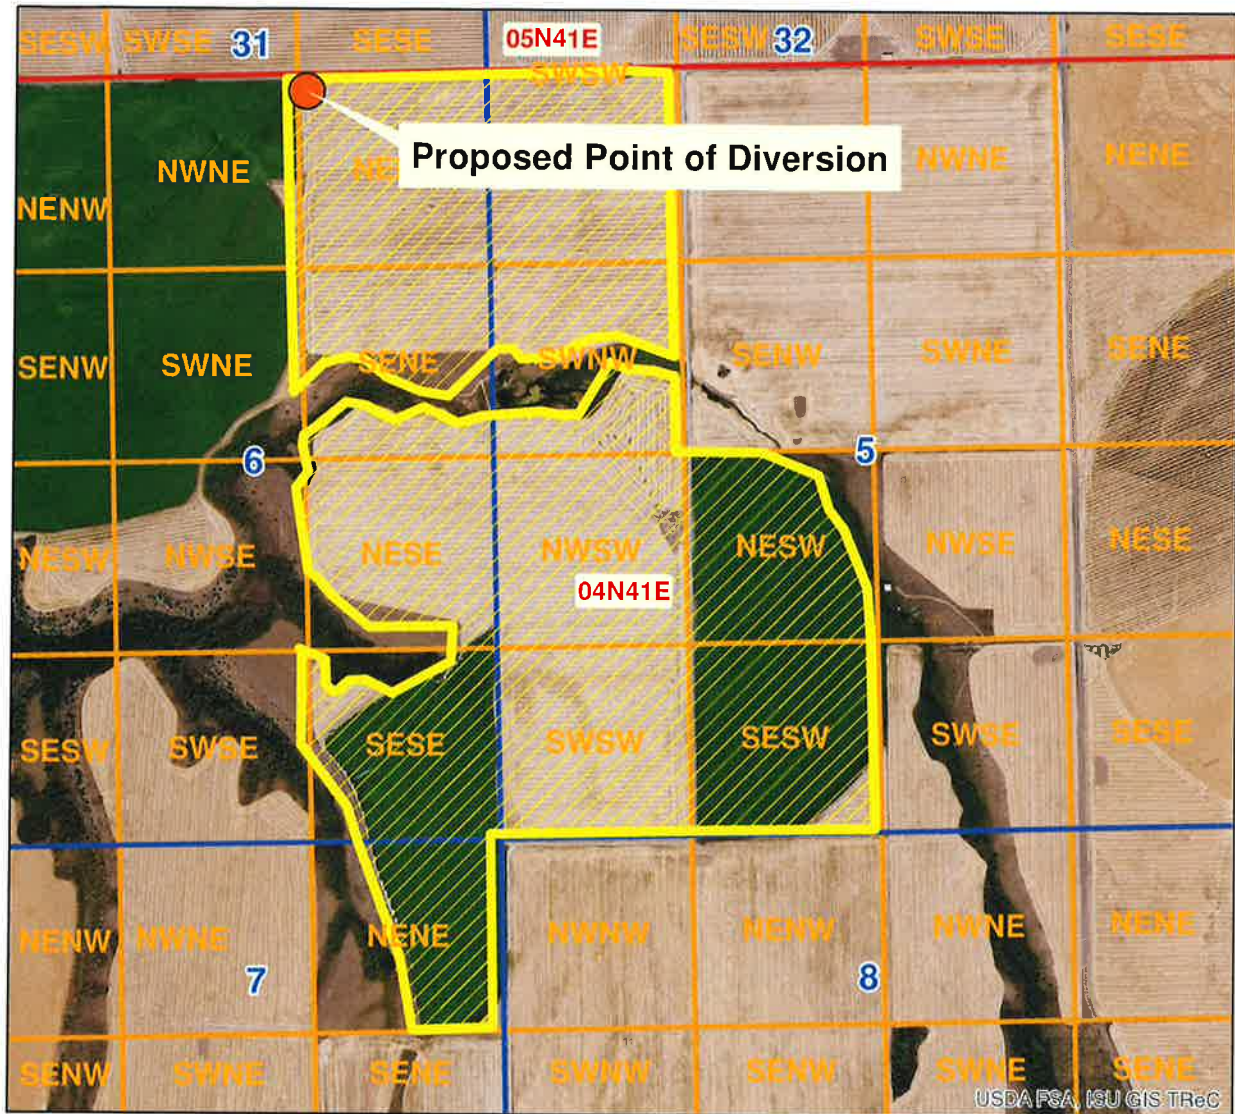

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Mitigation Plan

This application proposes to increase the authorized ground water diversion rate on the property. Existing ground water right 22-13670 authorizes a diversion rate of 2.18 cfs and the irrigation of 378 acres. Right 22-13670 is limited to 925.3 acre-feet per year (the volume that could be produced by pumping at 2.18 cfs for 214 days). This new application will not increase irrigated acres or the total annual diversion volume. I am only proposing to increase the diversion rate by 2.0 cfs, bringing the total ground water diversion rate to 4.18 cfs. I would be able to divert at 4.18 cfs for 112 days before reaching the 925.3 acre-foot volume limit. 485 acre-feet of this volume would be supplied by existing water right 22-13670, leaving approximately 440 acre-feet to be supplied by the new ground water right.

Water right 22-7115 authorizes 55 acre-feet of irrigation storage. In most years, the small reservoir which captures water under this right fills to at least 75% of capacity (41 acre-feet). In addition, water rights 22-7091 and 22-13454 authorize the diversion of 2.0 cfs from Lyons Creek for irrigation. Lyons Creek is spring fed and flows at least 1.0 cfs year round. During the spring and early summer, the flow in Lyons Creek is higher, sometimes exceeding 2.0 cfs. To mitigate for the new ground water right, I will hold water rights 22-7115, 22-7091 and 22-13454 unused. The unused water sinks in the Lyons Creek channel before reaching the Snake River. Non-use of the Lyons Creek water rights could provide as much as 650 acre-feet of recharge over the course of the irrigation season, depending on the water year.
