RE: Hayden Lake Decree Corrections

---

Water rights 95-200, 95-203, 95-238 were all inactive in the database. These are decreed rights in the Hayden Lake decree. Research revealed these should be active water rights in the database. Database updated to match decrees.

Water right 95-2194 was licensed on 4/2/1974 and supercedes water right 95-287 decreed 3/23/1973. Database updated to match license.

Water right 95-459 was decreed to two different people for two different water rights (Crawfort and Hurrell). Hurrell was nowhere in the database as if his water right did not exist, so created water right 95-9477 for his water right as decreed.

Water right 95-646 was decreed to two different people for two different water rights (Canning and Wood). Wood was nowhere in the database as if his water right did not exist, so created water right 95-9478 for his water right as decreed.
