Corey,

I have reached out to Eric and we both agree that a pre-hearing can be scheduled. Can you provide a list of possible dates/times?

Thanks

Travis

The applications are still protested. No request has been made for any pre-hearing conference. It sounds like there has been, or will be, some communication between the parties.

Subject: RE: Pica's Permit Applications

Dear Erick,

I am collecting the information that you requested on groundwater flow direction and the injections wells. We expect to present you the information by next week.

Don has not diverted water to the onstream ponds for over a month. The large pond is not fed by the unnamed stream. The recent changes in flow observed in the unnamed stream (drainage ditch) are not attributable to the Pica pond operations upstream.

It was observed that the Pica diversion on the Sands ditch was turned off last week. The waste water from the diversion flowed into the drainage ditch (unnamed stream diverted by Shaw). Don observed that the flow rate in the ditch decreased when his Sands ditch diversion was shut off.

We would like to resolve the protests as soon as possible.

Sincerely,

HATTIE ZOBOTT, P.E.

Professional Engineer, Project Engineer

Subject: Pica's Permit Applications

Dear Travis, Hattie, and Corey:

I received a phone call today from John Shaw regarding the permit applications submitted by Mr. Pica (Permit application numbers 36-17132 and 36-17133). According to John, the ponds proposed by the permit applications have been constructed with earth moving and are now holding water. Also John mentioned that he has recorded a decrease in the flow rate from Donkey Springs Creek over the last week, which could be because of the ponds.

For our information, what is the current status of these permit applications?

Thanks,

Erick
