

IN-OFFICE BENEFICIAL USE FIELD REPORT

Permit No: 78-12397

Examiner: Cody Parker

Date: July 19, 2018

In-office qualification (IDAPA 035.01.r):

- ☐ Irrigation ≤ 5 acres
☐ Stockwater storage ≤ 14.6 af
☒ Total diversion rate ≤ 0.24 cfs and not irrigation or storage

Current Owner Name: USDA Forest Service

Address: 500 N Mission St. Bldg 2, McCall, 83638

Beneficial Use Fee Paid: \$50.00

Receipt: C102738

Source: Spring

Source change? ☒ N ☐ Y Change clarifies originally intended source.
If not – void permit.

Comments:

Diversion Rate

Permitted Rate: 0.02 cfs

BU Standard Limit: 0.02 cfs

BU Fee Limit: 0.20 cfs

Theoretical (optional): cfs

Recommended Total Div Rate: 0.02 cfs**Annual Volume**

For Irrigation: cfs x 1.9835 x days = af
 acres x af/ac (FHR) = af
 Smaller of two volumes = af

For other uses: 0.6 afa for domestic per Admin AP Memo 22

Narrative: This permit authorizes the diversion of 0.02 cfs from a spring for domestic use. Proof was submitted November 29, 2016. I completed this field exam on July 19, 2018.

While the permit qualifies for an in-office exam, I had no means of confirming the location of the point of diversion from the aerial imagery or the information from the backfile. I attempted to access the location on July 19, 2019. I was unable to access the site due to a traffic accident, and I was informed by a local resident that there are private locked gates on the road leading up to the site.

I was able to confirm the location of the point of diversion through Holly Becker, a USFS hydro tech at the McCall Ranger Station. The POD is roughly located in the same location as it was permitted. There is a collection barrel at the spring which is fenced off to keep livestock out. Water from the collection barrel is piped to the cabin. Ms. Becker estimates that the system produces a max of 0.5 gpm.

The place of use is a single cabin located just southwest of the point of diversion. The cabin typically has a single occupant during the grazing season. Water from the spring is used for washing, but not necessarily for drinking.

I believe that the cabin is owned and operated by a grazing association under a special use permit from the USFS. Because the owners/users of the cabin are different than the permit holder, I have decided to retain condition 004 on the license.

RE: Water Right Permit Nos 78-12396 & 78-12397

Dear Ms. Becker,

I am writing you today in regard to the water right permits referenced above. Permit 78-12396 authorizes the diversion of water from a spring for domestic uses associated with a primitive cabin near Goose Lake. Permit 78-12397 similarly authorizes diversion from a spring for the Elk Lake Rider Cabin. Proof of Beneficial Use has been submitted for both of these permits indicating that development is now complete. The next step in the water right process is to complete a field examination for these permits to confirm the extent of beneficial use of water. Because these permits describe the diversion of a relatively small amount of water, I am able to complete the examination from the office. However, to complete the exam I require additional information.

I have enclosed maps for each of the two permits referenced above. On each of the maps I need you to show the location where water is diverted from the source. Please edit the maps and return to me at the address listed in the letterhead above, or scan and email to cody.parker@idwr.idaho.gov.

I look forward to your reply within thirty (30) days of the date of this letter. If you do not make a timely reply I will assume that you have no further interest in pursuing a water right license, and I will take action to void the permit. Please let me know if you have any questions. Thank you for your time and for your attention to these matters.

Respectfully,

Cody Parker
