WATER SUPPLY BANK LEASE CONTRACT No. 832

4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).

7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Clay,

My concern is the number of irrigated acres that are leased to the bank. It should be the 95.7A identified as the places of use to be idled on p.4. However, p.1 seems to state it is 100.1A which is not correct as 246.1A will continue to be irrigated out of the 341.8A total allowed under the 3 water rights.

Jim,

In reviewing this lease I found that we were going to place disproportionate amounts of the water rights 37-2609B and 37-2618 into the bank. These two rights are limited to a common 162.8 acres. In order to place 9.4 acres of these rights into the bank, and keep them proportional, I had to calculate how much of 37-2609B would have to be placed into the bank. This was done by taking 37-2609Bs acre limit of 75.8 acres dividing it by the combined acre limit of 162.8 acres and multiplying it by the acres wished to be idled which is 9.4 acres. By calculating the lease in this way, we keep the diversion rates and volumes proportionate on the leased portions of the water rights and the unleased portions of the water rights including on the combined limits.

Jim,

I sat down and reviewed these changes with Jean per the water right records. I found issues with the way they were calculated in 2015 that could have caused some enlargement issues in the event of rentals. The math on this lease will keep the leased water rights, with combined limits, proportional. I apologize for the confusion with the past lease. I requested that Jean make these adjustments to address those concerns.

Sincerely,
Clay Webster

Jean,

I believe the acre limit for the lease of 37-2609B was looked at by Clay in 2015 and changed back to the applied for amounts which were then approved for 2015 through 2018. I see no reason why they should change for this new contract.
