In-office/Field Examination Report

NARRATIVE/REMARKS/COMMENTS

The application for permit included a map showing the public land survey. The quarter quarter line at the time of the application extended into Twin Lakes several feet. The current quarter quarter is closer to the shoreline. This is the difference between SWSE and Lot 1 (SWSE). The permit holders should not be required to file an amendment based upon the change of the quarter quarter line.

This domestic right is for outdoor use only. On October 10, 2018, Scott Blew send an email confirming that the in-house water system does not allow them to irrigate.

It is worth noting that on April 15, 2013, Roger Johnson from the Idaho Department of Lands (Lands) sent an objection to 95-16548. According to the email, the property already had a doc that was not permitted. Mr. Johnson further states that the existing non-compliance issues would have to be resolved before any additional water line encroachment permit would be issued by Lands. I do not find any evidence in the file that this issued was resolved before the Department issued the permit on May 16, 2013. The permit does include the following condition:

This right does not gran any right-of-way or easement across the land of another.

The permit also includes a fish screen requirement. *The Statement of Completion for Submitting Proof of Beneficial Use* acknowledges the requirement. The permit holder checked yes that a fish screen has been installed.

Subject: Water right permit 95-16548

Hello, I am working toward licensing water right permit 95-16548 and have a question. The permit is for domestic use for outside irrigation. Does Lake Forest Home Owners Association provide in-house domestic water use?
