Categories: Office Day

Dan,

Just so you know, when I spoke with Darla, she said that your file was never taken out of the queue for processing. Her letter to you was to acknowledge the receipt of the Proof of Beneficial Use = The file is in line for the final steps for licensing.

Darla's note regarding the fish screen was to help you make sure that you had a chance to comply with all of the conditions before the final licensing inspection. (She was following the checklist you filled out on the form). Nothing was delayed in the process, but your phone call and emails will make it easier for the Water Resource Agent to know what to look for and how to sign off on the final license.

Thanks for your understanding with this,

Dave Betts

Hi Dave,

I tried to email Darla, but was unable to navigate thru your server, with passwords all !

Could I ask you to please copy Darla with this letter, if you have not all ready.

In addition to talking to you, I also spoke with Adam, in the CDA office; your Northern region. Adam read my letter, and moved forward with his aspect.

As Adam will witness when he does his field exam, I do have a fish screen, installed.

Thank you for all your help.

Dan Fogarty

Hello Dan,

You can email Darla Block directly (Darla.Block@idwr.idaho.gov) and let her know that you accidentally checked the wrong box with respect to the fish screen. Also refer her to the worksheet you sent with the Proof of Beneficial Use form.

I thought that I might be able to get things moving again even though Darla wasn't here today, but it will be quicker to wait for her to change the status. Darla will be able to make sure that all of the appropriate individuals are notified in order to take care of the remaining steps in the Licensing process. I don't want to inadvertently miss a step and set you back.

Please let me know if you have any additional questions.

David,

Can you do a conversation memorandum to the file explaining the call and what was discussed? It would take care of the issue by placing the memo in the file.

Hello Darla,

I received an Office Day phone call on Friday regarding the reply you sent to a Proof of Beneficial Use. The customer, Dan Fogarty, was confused as to why he was notified that he needed to install a fish screen.

With his Proof of Beneficial Use, Fogarty sent in a worksheet that includes a description of the fish screen. While I was on the phone with Fogarty, I figured out why you had sent the notification. He had inadvertently checked "No" next to the question asking about installing a fish screen.

Fogarty called to make sure that his application can continue through the licensing process. Does he need to resubmit the Proof of BU or can you change the status of that question for him and move his file forward from there?

Thanks,

Dave
