James,

When last we spoke regarding the Randy Pehrson transfer, you expressed a concern that by moving the senior right for 2 cfs from one property to another, it could result in an enlargement of the supplemental ground water usage at the existing place of use. We discussed possibly compensating for this concern through use of storage water. I spoke with Randy this morning about your concern. Randy informed me that he just purchased another 15,000 inches of storage water in July that has already been transferred to the Burnett Ditch, the point of diversion for the exiting place of use. In total, Mr. Pehrson now owns 25,000 inches of storage water. I believe the additional storage water that he purchased to be used on the existing place of use is a nice insurance policy against enlargement of the ground water right.

Other information I learned from Randy:

1. The Pass Creek rights are delivered through a pipeline.
2. The more senior Pass Creek rights, 1883 and 1903 are on about all summer. Even the 1907 right is on much of the time, especially this year.

We are more than happy to meet with you to discuss historical use in more detail. Let me know if this alleviates the concern or if we need to discuss this further.

Thanks,

---
