☐ Change nature of use

If yes, ☐ attach an explanation and any supporting documentation labeled as **Part 1A.2**.
- Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.3**.
Applicant is contracted to purchase ground water rights and proposes to transfer them to a new property for irrigation of lawn and landscaping. See Part 1A.3 for additional information on the water right to be transferred.

Narrative of Application for Transfer

Rainey Creek Enterprises LLC

Applicant is purchasing 5.4 acres of water right 35-2568 to be transferred to other properties for irrigation purposes. Transfer 82568 proposed to move 2.7 acres to a separate property. This transfer proposes to move the remaining 2.7 acres to another property for the irrigation of lawn and landscaping. The purchased acres and the acres proposed to be transferred are illustrated in Attachment #7a.

Water Right Nos. 35-2568 and 35-7769 are appurtenant to property owned by Todd and Jennifer Cook. Conditions contained in these water rights limit the collective diversion volume of these water rights to 2,476 acre-feet for the irrigation of 619 acres. There is no combined diversion rate limit for these water rights. 35-2568 contains an individual acre limitation of 509 acres. 35-7769 does not contain an express individual acre limitation of the remaining 110 acres ($619 - 509 = 110$), however an inferred individual acreage limit of 110 acres is consistent with the 2.22 cfs diversion rate described in this water right. At one miner's inch (.02 cfs) per acre, a diversion rate of 2.22 cfs would be authorized to irrigate 111 acres. For practical and legal purposes, 35-7769 has an individual acre limitation of 110 acres.

Based on past transfers filed with the Department, we understand that Department staff may categorize Water Right Nos. 35-2568 and 35-7769 as "stacked water rights." There is no statute or administrative rule that defines "stacked water rights." However, page 28 (Section 5d.(3)) of the *Administrator's Memorandum, Transfer Processing No. 24* (December 21, 2009) (the "Transfer Memo"), provides the following IDWR definition of "Stacked Water Rights" under the Enlargement of Use section:

Water rights are "stacked" when two or more water rights, generally of different priorities and often from different sources, are used for the same use and overlies the same place of use. Water rights for irrigating a permissible place of use are not necessarily stacked when the water rights in total provide for irrigating up to the maximum acreage authorized within a permissible place of use.

Based on this definition in the Transfer Memo, Water Right Nos. 35-2568 and 35-7769 are not stacked because the water rights individually and in total provide for irrigating up to the maximum acreage of 619 acres authorized within the permissible place of use contained in both water rights. Accordingly, the water rights can be transferred separately without raising enlargement concerns.

The transfer submitted with this analysis proposes to unstack 2.7 acres of 35-2568 to move the 2.7 acres to a new place of use. Because the individual acreage limit under 35-2568 will be reduced by 2.7 acres and the overall acreage limit of 619 acres will be reduced by 2.7 acres, there is no enlargement of either 35-2568 or 35-7769.

Other transfers may be pending from these water rights which would affect the total acres represented under the water rights as described herein.

AGREEMENT FOR PURCHASE AND SALE OF WATER RIGHT

THIS AGREEMENT FOR PURCHASE AND SALE OF WATER RIGHT (this "Agreement") is made and entered to be effective as of the 18 day of May, 2018 (the "Effective Date"), by and between **Todd Cook and Jennifer Cook**, husband and wife, whose address is 796 N. 1800 W., Blackfoot, Idaho 83221 (hereinafter "Seller"), and **Rainey Creek Enterprises LLC**, an Idaho limited liability company, whose address is P.O. Box 5, Irwin, Idaho 83428 (hereinafter "Buyer"). Buyer and Seller are individually a "Party" and together the "Parties".

RECITALS:

- A. Seller owns Water Right No. 35-2568 (the "Water Right"), which was decreed on April 30, 2002 in the Snake River Basin Adjudication by the District Court for the Fifth Judicial District of Idaho for irrigation purposes with a priority date of March 20, 1959. The current description of the Water Right is more fully set forth in the report obtained from the Idaho Department of Water Resources ("IDWR" or the "Department") attached hereto as **Exhibit 1**.
- B. Seller desires to sell, and Buyer desires to buy, a 5.4-acre portion of the Water Right. Buyer has agreed to purchase the 5.4-acre portion of the Water Right from Seller as set forth in the terms and provisions of this Agreement.

AGREEMENT:

IN CONSIDERATION of the mutual representations, warranties, and covenants contained herein, the Parties, intending to be legally bound hereby, agree as follows:

1. Property Purchased. Seller hereby agrees to sell to Buyer, and Buyer agrees to buy from Seller, on the terms and conditions herein specified, the following-described portion of the Water Right.

Source:	Ground water
Purpose:	Irrigation
Priority:	March 20, 1959
Quantity (Diversion Rate):	0.06 cfs of the total authorized 5.25 cfs
Quantity (Volume):	21.6 acre-feet per annum
Place of Use (Acreage):	5.4 acres of the 509 authorized acres identified on Exhibit 2 .

The above-described portion of the Water Right is referred to hereafter as the "Purchased Water Right."

2. Property Retained. Other than the Purchased Water Right, Seller reserves and retains unto Seller all remaining portions of the Water Right and any other water rights that may be appurtenant to the authorized place of use for the Water Right. No land, easements, or other property interests, other than the Purchased Water Right, are included in this Agreement.
3. Purchase Price. The purchase price for the Purchased Water Right is [REDACTED] (the "Purchase Price").
4. Earnest Money Deposit. Contemporaneous with the execution of this Agreement, Buyer shall deliver to Seller earnest money in the amount of 10% of the Purchase Price, which is [REDACTED] (the "Earnest Money"). The Earnest Money shall be applied towards the Purchase Price at closing, or otherwise disposed of as provided herein.
5. Transfer Application. Within 30 days after both Parties sign this Agreement, Buyer will file with IDWR an *Application for Transfer of Water Right* (the "Transfer") to amend and move the Purchased Water Right to Buyer's desired location. The Parties will cooperate in obtaining IDWR approval of the Transfer and will provide and execute any necessary documents requested by IDWR. Buyer will be responsible for the costs to file the Transfer, including all attorney fees, consultant fees, and filing fees associated with preparation of the Transfer. In the event this Agreement is terminated pursuant to paragraph 6 of this Agreement, Buyer shall at its sole expense take such action as may be required to void or reverse the Transfer in order to return the Purchased Water Right to the condition it existed on the Effective Date, upon completion of which the Earnest Money will be returned by Buyer within 14 days of such completion.
6. Transfer Contingencies.
 - (a) Unstacking of Water Rights. While the elements of the Water Right and an associated water right, Water Right No. 35-7769, are sufficiently described to allow IDWR to "unstack" these water rights, this Agreement shall be null and void and of no further effect if IDWR does not unstack the Purchased Water Right from Water Right No. 35-7769.
 - (b) Lien Release. If, after exercising commercially reasonable efforts, Seller is unable to obtain a lien release on the Water Right, this Agreement shall be null and void and of no further effect, and Buyer shall return the Earnest Money to Buyer.
 - (c) No Protests. If no protests or other objections to the Transfer are filed with IDWR, but the Transfer is (i) denied, (ii) approved by IDWR for less than 5.4 acres, or (iii) approved by IDWR with conditions that materially devalue the

Purchased Water Right for Buyer's intended use thereof; then Buyer may terminate this Agreement within 14 days after the date of the IDWR approval notice by providing written notice of termination to Seller. Within 14 days of receipt of the notice of termination, Seller shall refund the Earnest Money to Buyer. If Buyer does not terminate this Agreement as provided herein, the Parties shall proceed to Closing as set forth in paragraph 7.

- (d) Protest Filed. If a protest or other objection to the Transfer is filed with IDWR, then Buyer may terminate this Agreement within 180 days after the protest is filed with IDWR. If Buyer does elect to terminate this Agreement, Seller shall refund the Earnest Money to Buyer within 14 days of receipt of the notice of termination.

7. Closing.

- (a) Closing Date. If (1) the Water Right is unstacked from Water Right No. 35-7769; and (2) no protest to the Transfer is filed with IDWR and (3) IDWR issues a transfer approval consistent with paragraph 6(b), then Closing on the Purchased Water Right shall occur within 30 days after the date all the above items are satisfied. If a protest or other objection to the Transfer is filed with IDWR and Buyer does not exercise the contingency set forth in paragraph 6(b) of this Agreement, the Closing shall occur with 14 days after the 180-day termination period expires. Notwithstanding the above, the Parties may mutually agree to another date for the Closing.
- (b) Closing Location. The Closing shall occur at the offices of Holden, Kidwell, Hahn & Crapo, P.L.L.C, or at another location mutually agreed by the Parties.
- (c) Documents to be Delivered at Closing.
 - (1) At Closing, Buyer shall deliver the Purchase Price less the Earnest Money.
 - (2) At Closing, Seller shall deliver to Buyer the Special Warranty Deed (the "Deed") substantially in the form attached to this Agreement as **Exhibit 3** for the Purchased Water Right, and any lien release or other documents reasonably requested to confirm the conveyance of the Purchased Water Right free and clear of encumbrances.
- (d) Fees and Costs of Closing. The cost of recording the Deed after Closing shall be paid by Buyer. All other expenses not specifically referenced in this Agreement but related to the Transfer and incurred by Seller or Buyer with respect to this transaction shall be borne and paid exclusively by the Party incurring the same, without reimbursement.

- 8. Default. In addition to either Party's failure to perform any material term or condition of this Agreement or a Party's breach of any of such Party's representations or warranties (in which event the non-defaulting party may pursue any available remedy, including

equitable relief), Buyer shall be deemed in default hereof if Buyer files a petition in bankruptcy or is adjudicated bankrupt or insolvent, Buyer makes an assignment for the benefit of its creditors, or consents to the appointment of a receiver of itself or of its property, or institutes proceedings for its reorganization, in which case, in addition to any other remedies or rights Seller might have, Seller shall have the power and authority to notify the Department that the Application for Transfer has been withdrawn.

9. **Seller's Representations and Warranties.** Seller hereby represents and warrants to Buyer, as of the Effective Date and again as of the Closing as follows:

- (a) **Authority.** Seller has the full legal right, power and authority to enter into and perform this Agreement, and will obtain good marketable title to the Purchased Water Right in fee simple, and Seller (at its expense) shall remove, or shall exercise commercially reasonable efforts to cause to be removed, all liens, claims, or encumbrances, whether of record or not, upon or affecting the Purchased Water Right on or before Closing. If, after exercising commercially reasonable efforts, the liens, claims, or encumbrances are not removed by Closing, Seller may terminate this Agreement.
- (b) **Conveyance.** Seller shall then convey the Purchased Water Right free and clear of all liens, encumbrances and restrictions, except such restrictions on the use of water as may appear on the Water Right Report contained at **Exhibit 1**.
- (c) **Appurtenance.** The Purchased Water Right is appurtenant to and has been beneficially used as the water source to irrigate its place of use and/or been properly preserved for future use consistent with Idaho law.
- (d) **Not Forfeited.** No portion of the Purchased Water Right has not been forfeited or abandoned in whole or in part.
- (e) **No Representation or Warranty Concerning Suitability for Buyer's Intended Use.** Seller has not made, and hereby makes, no representation or warranty to Buyer except as expressly contained in this Agreement.

10. **Buyer's Representations and Warranties.** Buyer hereby represents and warrants to Seller as of the Effective Date and again as of the Closing for the Purchased Water Right, as follows:

- (a) **Authority.** Buyer has the legal power, right and authority to enter into this Agreement and to perform Buyer's obligations hereunder.
- (b) **Buyer's Due Diligence.** Buyer and Buyer's consultants and counsel have had a full opportunity to review all documents, records and other information made available to Buyer by Seller and/or otherwise reasonably available to Buyer through public or other sources, related to the nature and extent of the Purchased Water Right, the laws and rules affecting their transfer and use by Buyer, and the suitability or fitness of the Purchased Water Right for Buyer's intended purposes.

11. Warranties to Survive Closing. All representations and warranties made by the Parties herein are also covenants, and each Party shall take all such actions as may be required to satisfy said covenants and to cause the representations and warranties to be true on and as of the Closing. The Parties' respective obligations to close and consummate the transaction contemplated herein are contingent upon the representations, warranties and covenants contained in this Agreement being true, valid and satisfied on and as of the Closing. All such representations and warranties shall survive the Closing.

12. Miscellaneous.

- (a) Attorneys' Fees. If either party commences any legal action or proceeding to enforce any of the terms of this Agreement (or for damages because of an alleged breach hereof), the prevailing party therein shall be entitled to recover from the other, in addition to any other relief granted, its reasonable attorney's fees, costs and expenses incidental to such legal action.

EXHIBIT A
WATER RIGHT DESCRIPTION
(TO BE COMPLETED AFTER APPROVED TRANSFER)

ESPA Modeling Calculations

Rainey Creek Enterprises LLC

Applicant proposes to transfer 2.7 acres to a new well in SESW Section 36, T2N, R43E. The TO Well location is located about 25 miles up the South Fork Snake River from the ESPA Model boundary. Since the effects of the TO well are primarily to the South Fork Snake River, the nearest model grid cell R78 C180 is used to represent the effects of the proposed pumping. See Figure A below. The primary choice of grid cell was R77 C181, which is closer to the Snake River, north of the grid cell used. However, it was identified as an invalid cell in the modeling analysis.

Figure A. TO Well location near ESPAM Grid cells.

The FROM Well location is the farthest of two wells pertaining to water right 35-2568. The well in R68 C127, see Figure B, was chosen to represent the greatest possible distance the water will be transferred from the FROM Well to the TO Well.

To evaluate the effects of the proposed transfer, the ESPA Transfer Analysis Spreadsheet 3.2 was used. Excerpts of the model run are included as Figures C-E. The existing place of use of the 2.7 acres proposed to be transferred is allotted 4 AFA/ac for the field headgate requirement and 3 AFA/acre as a consumptive irrigation requirement. The proposed TO Well location has a lower irrigation requirement of 3.5 AFA/ac for the field headgate requirement and 2.5 AFA/ac as a consumptive irrigation

requirement. The modeling analysis was performed using the consumptive irrigation requirements, given in Table 1, for each well location.

Figure B. FROM Well location with ESPAM Grid cells.

Table 1. Modeling Input Volumes

Well	Acres	Consumptive Irrigation Requirement	Volume Modeled	
		AFA	AFA	AF/Tri
TO Well	2.7	2.5	6.75	2.25
FROM Well	2.7	3	8.1	2.7

Results of the modeling analysis show depletions only to the Heise to Shelley reach of the Snake River, not exceeding 1.7 af/trimester, a *de minimus* amount that does not exceed the Idaho Department of Water Resources mitigation threshold. All other reaches will either have no effects or a benefit will be expressed.
