Dear Applicant:

The Department of Water Resources (Department) received watermaster concerns about applications to transfer the above mentioned water rights on August 31, 2018.

The Department is required to evaluate these applications in accordance with Idaho Code § 42-222. On April 19, 2018 and again on June 4, 2018 the Department requested additional information for clarification of your applications. Some of the information provided in your responses received on May 15, 2018 and June 26, 2018 did not adequately clarify the diversion and delivery systems or historical beneficial use for these water rights.

The following is a list of items that need to be clarified prior to further processing of these applications;

- **Supply maps of the conveyance and distribution systems for transfers 81963 and 81964. Make sure it shows how the water is being conveyed from all sources to the pivot systems (ditches or pipes). Include groundwater wells and connections between the systems.**
- **Supply a map of the conveyance and distribution systems of the Pines ditch, point of diversion P19 in NESW S2, T12N, R23E.**
- **Supply a map of lands irrigated via ditch, flood, groundwater, pivot and sprinkler irrigation systems within the last five years.**

Please provide the department with the requested information within 14 days of this letter. If you have any questions on this matter, please contact me at (208) 287-4910.

Sincerely,

Clay Webster
Water Rights Supervisor

Jim,

We received watermaster comments on these transfers which I am reviewing now. They are scanned to water right files 73-15A and 73-150C and can be viewed through the search tools on our web site. The protests received were from IDFG.

Sincerely,
Clay Webster
