Dave,

This looks like it addresses the points we discussed to better describe the water right. I appreciate your being able to work with me on this matter.

Thank you,

Steve

Hello Steve,

Here is the final wording on the conditions that you requested for Application 75-14898 (Wing).

- "11. Point of diversion and place of use are located on a 5.0 acre parcel of private property in the Moose Creek Hydraulic Placer Claim, Mineral Survey 3057, specifically described as the third of three subdivisions from the Moose Creek Hydraulic Placer Claim in Public Land Ordinance 5522.
12. The point of diversion and place of use are not located on federal land."

I'll be writing up something similar for 75-14899 (Albert) and send that information soon. The Alberts' application still has another week waiting for comments before I'll get the file back to finalize my review.
