STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

Transfer No. _____

RECEIVED
JUL 16 2018
DEPARTMENT OF WATER RESOURCES

MINIMUM REQUIREMENTS CHECKLIST
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at www.idwr.idaho.gov.

Name of Applicant(s) Andrew M. Knight & Kathleen M Knight

Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.

Yes	N/A		
		*	Means the item is always required and must be included with the application.
☑		*	Completed Application for Transfer of Water Right form, Part 1.
☐		*	Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
☑		*	Application for Transfer Part 2A. Attach a Part 2A report describing each water right in the transfer as currently recorded.
☐	☑		Complete and attach an Application for Transfer Part 2B for each water right for which only a portion is proposed to be changed through this transfer application.
☑		*	Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
☑		*	Correct fee submitted with transfer application form. (Fee schedule is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

☐	☑	#1	If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
☐	☑	#2a	Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
☐	☑	#2b	If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s).** ** Additional fee(s) required for water right ownership changes; see fee schedule.
☐	☑	#3	Documentation of authority to make the change if the applicant is not the water right owner.
☐	☑	#4	Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
☐	☑	#5	If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at www.idwr.idaho.gov/WaterManagement/WaterRights/WaterRightTransfers/resources.htm.
☐	☑	#6	Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
☑		#7a	Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
☑	☐	#7b	If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
☐	☑	#8a	If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see fee schedule.
☐	☑	#8b	If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
☐	☑	#9	Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. (Attachment WSB)
☐	☑	#10	Other. Please describe: _____

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1

Name of Applicant(s) Andrew M. Knight & Kathleen M Knight Phone (208) 756-4484

Mailing address P.O. Box 71, Lemhi, ID 83465 Email knightranchvf@yahoo.com

☐ If applicant is not an individual and not registered to do business in the State of Idaho, attach documentation identifying officers authorized to sign or act on behalf of the applicant. Label it **Attachment #1**.

☐ Attach water right ownership documentation if Department records do not show the transfer applicant as the current water right owner. Label it **Attachment #2a**.

☐ If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). Label it **Attachment #2b**.

☐ Attach documentation of authority to make the proposed change if the applicant is not the water right owner. Label it **Attachment #3**.

Provide contact information below if a consultant, attorney, or any other person is representing the applicant in this transfer process.

☑ No Representative

Name of Representative _____ Phone _____

Mailing address _____ Email _____

☐ Send all correspondence for this application to the representative and not to the applicant.
OR
☐ Send original correspondence to the applicant and copies to the representative.

☐ The representative may submit information for the applicant but is not authorized to sign for the applicant.
OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant and label it **Attachment #4**.

I hereby assert that no one will be injured by the proposed changes and that the proposed changes do not constitute an enlargement in use of the original right(s). The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Andy Knight — Signature of Applicant or Authorized Representative

A. PURPOSE OF TRANSFER

1. ☑ Change point of diversion ☑ Add diversion point(s) ☑ Change place of use
☐ Change nature of use ☐ Change period of use ☐ Other _____

2. Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.2.**
Combine 3 water rights into a single gravity fed irrigation system. Move a POD downstream to provide flexibility between a gravity system and pumping station. Adjust the irrigation POU to accommodate a new pivot, handlines and pods. Please see attached cover letter for more detail.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
Water will enter the gravity fed pipeline through a gated inlet structure and bubbler screen at the POD on Little Sawmill Creek. A CMP inlet structure will be installed in creek. Both systems will be outfitted with approved flow meters.

b. Who owns the property at the point(s) of diversion? Andy & Kathleen Knight own property @ gravity & pump divers.
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
The L-43C diversion at the Lemhi River already exists. It appears to be in the right of way for state highway 28 or Shiner Ranch Inc.

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: _____

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?
If yes, ☐ complete Attachment WSB.

e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
The new system will deliver water to existing irrigated land in new pipelines and the addition of a pivot will apply water in a more efficient manner. A land swap between Knights and Guardian Limited withholds acres and reintegrates them into the POU to accommodate a pivot. See attached warranty deeds and land survey.

f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
N/A

g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☑ undergone a period of five or more consecutive years of non-use,
- ☐ ☑ currently leased to the Water Supply Bank,
- ☐ ☑ currently used in a mitigation plan limiting the use of water under the right, or
- ☐ ☑ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 2

A. DESCRIPTION OF RIGHT(S) AS RECORDED

For each water right listed in Part 1B.1 of the application, attach a **Part 2A** report obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 1.
Insert Part 2A reports into the application following Part 1.

B. IF ONLY A PORTION OF THE RIGHT IS PROPOSED TO BE CHANGED, DESCRIBE THE PORTION BEING CHANGED AS IT APPEARS BEFORE THE REQUESTED CHANGES

☐ Complete and attach one copy of Part 2B for each right for which only a portion is proposed to be changed. If the entire right is proposed to be changed, Part 2B is not applicable. Additional copies of the **Part 2B** form can be obtained from any Department office or from the Department's website @ www.idwr.idaho.gov, Water Right Transfers, Step 3, or Water Right Forms, Changes in Use. Insert completed Part 2B forms into the application following Part 2A of the same water right.

Rev. 01/15

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 3

A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)

☑ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
☑ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b.**

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

☐ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

These applications propose the diversion and use of water from Hawley Creek tributary to Eighteenmile Creek a tributary of the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in these applications will benefit from the subordination provision because it is non-consumptive.

RE: Transfer No. 82523
Water Right No(s). 74-15534, 74-15536, 74-1865

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the RECORDER HERALD on 9/20/2018 and 9/27/2018. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Jean Hersley

WATER DISTRICT #170 ***via e-mail***
CINDY YENTER
102 S WARPATH
SALMON ID 83467

RE: Application for Transfer No. 82523
Water right Nos. 74-1865, 74-15534 & 74-15536

Dear Cindy:

The Department of Water Resources is seeking written comment and/or recommendations from you regarding the above referenced water right application for transfer. You can find a copy of the application at: http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the water master, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR's regional offices can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Jean Hersley

RE: Application for Transfer No. 82523
Water right No. 74-1865, 74-15534 & 74-15536

Dear Interested Party:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced water right application. You can find a copy of the application at:
http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx.

This office can publish notice of the application as soon as the initial review is completed; therefore, your prompt response to this request is appreciated. If your agency desires to formally protest the approval of this application, you may do so after the notice is published by filing a written protest along with a $25.00 filing fee within 10 days after final publication.

Please contact this office if you have any questions regarding the application.

Sincerely,

Jean Hersley

MEMORANDUM

Date: September 13, 2018

To: Transfer 82523

From: Clay Webster

Re: Review & Evaluation of Sufficiency of Information

The department received this application for Andrew M. Knight & Kathleen M. Knight to implement a fish habitat restoration project on Little Sawmill Creek and Indian Springs in Lemhi County from the Upper Salmon Basin Watershed Program. They have three water rights involved in this transfer. 74-1865 is a Springs right for the irrigation of 4 acres. 74-15534 is an irrigation right from the Lemhi River which authorizes the irrigation of 60.8 acres along with 74-15536 from an unnamed stream. 74-15536 also has a stockwater component.

They propose to change their place of use (POU) for the irrigation component of these rights to accommodate a new pivot, handlines and pod sprinkler lines. They also have identified the location of their pipeline and six troughs to be utilized for the stockwater component of 74-15536. This will change the POU of the stockwater component of 74-15536 which currently shows as same as irrigation.

The applicant provided two separate POUs for the irrigation component of these water rights. However, the water will be diverted through the same pipeline. Cindy Yenter of the Salmon office provided insight that the system is designed with a valve to allow isolation of the two separate systems.

They also propose to add a new POD and change a current POD to water right 74-15536 (unnamed stream, locally known as Indian Springs or Little Sawmill Creek). The changed POD is located in **SWNW S33,T18N, R24E** for the irrigation system. The added POD is located **SWNE of S33, T18N, R24E** for the stockwater component per amendment received August 27, 2018.

They also propose to change a point of diversion (POD) for water right 74-1865 (spring tributary to Little Sawmill Creek) in the **NESWNE of S32,T18N, R24E,** from the current POD listed on this water right of the **NESENE of S32,T18N, R24E.** This change will be moving the POD from the springs to the tributary. Conditions will be added to avoid enlargement concerns.

Authority to File:
This application was signed by Andy Knight and Kathleen Knight. Lemhi County Tax records show property for the place of use proposed for irrigation in owned by Andrew Knight and Guardian Limited Partnership. The applicant has provided warranty deeds documenting an exchange of land excluding water rights between Andrew and Kathleen Knight and Guardian Limited Partnership for the proposed place of use identified as belonging to Guardian Limited Partnership.

Water Right Validity:
74-1865 was partially decreed in March of 2005. 74-15534 and 74-15536 were partially decreed in July of 2009. 74-15536 was involved in transfer 74837 which added the POD in the NESWNE of S32, T18N, R24E. Aerial imagery shows that the entire POU has been irrigated as recently as 2017. No concerns of forfeiture are noted. The department does not normally describe a POD to the 10acres tract unless it is for a spring. The POD in the NESWNE of S32, T18N, R24E for the unnamed stream will be changed to reflect the QQ.

Injury to Other Water Rights:
This transfer application does not propose to authorize any additional diversion of water or increased beneficial use. A review of area water rights shows that there are no points of diversion between the original springs location and the confluence of Little Sawmill Creek and the new proposed point of

diversion of 74-1865 on Little Sawmill Creek. No injury is anticipated.

Enlargement of Use:
This transfer will not authorize any additional diversion of water nor increased beneficial use. This transfer will move 3.5 acres worth of irrigation of water rights 74-15534 and 74-15536 to the NWSW of T18N, R24E, S28. Water right 74-999 currently authorizes 36 acres of irrigation in this Quarter Quarter (QQ). According to map review there are 40 acres in this QQ. The proposed irrigation change can be made without an overlap of water right 74-999. The POD move of 74-1865 is to move the water right diversion from the Spring that is Tributary to Little Sawmill Creek to Little Sawmill Creek and will have to be conditioned to make sure that this water right can only be diverted when water is available at the original location. The stockwater component of 74-15536 is not additive to the irrigation. This information was conveyed to the applicant in the request for additional information letter sent August 14, 2018. The stockwater component and irrigation component of 74-15536 will need to still be limited to 1.82 cfs. Rights 74-15534 and 74-15536 will carry the combined limits that are already on the rights. Measurement device requirement conditions will have to be added to 74-1865.

Local Public Interest:
There are no apparent issues identified. Comments will be requested from the watermaster to identify any local public interest concerns. This application will be advertised to allow local concerns to be addressed.

Beneficial Use/Conservation of Water Resources:
This proposed transfer will not change the authorized beneficial use under these rights. The transfer appears consistent with the conservation of water resources in Idaho.

Effect on Economy the Local Area:
No effects are anticipated.

Effect on Agricultural Base of the Local Area:
This application should have no effect.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Abbie,

Upon our final review, we found some discrepancies in the legal descriptions on the irrigation POU. We also will have to place all three rights within an overall POU due to the fact that they will all be diverted into the same system. I have attached a new Point of Diversion/Place of Use Supplement page for the Knights review and approval. You will notice that it lists all of the PODs upon completion of the transfer and the POU for the irrigation and the Stockwater uses. Please let me know if you have any questions. Thanks for your help.

Hi Clay,

I was out for a few days and in the meantime, the project sponsor, Bob Minton at LSWCD, reviewed the additional information with the Knights and had them sign and initial the changes. I know it's not as polished as it would be if I had made the changes you suggested ahead of their review, but I'm hoping it will suffice.

By now, you may have received the hard copy in the mail, but if not, here is the digital version.

Subject: FW: Request for Additional Information on Transfer Application 82523

Abbie,

I have looked through your documents. On the Supplement Application for Permit additional POD/POU document I recommend putting "See Attachment # B3" on the POD. Like you did on the original application for the PODs. Then please have the Knights sign the bottom of the page on the new attachment #B3. The Stockwater POU listed will need a couple of small changes in the box in NENE, T18N, R24E, Sec 32 you should have L1 under the S, in the box NWNW T18N, R24E, Sec 33 should have L4 under the S. These will signify the government lot numbers under those POU designations. Everything else looks in order. I will need the original amendment mailed to me with the signature on the amendment. I look forward to receiving the completed documents.

Sincerely,
Clay Webster

Re: Knight Application No. 82523, additional information request

Dear Clay,

We received your request for additional information on our transfer of water rights application 82523 for water rights 74-1865, 74-15534, and 74-15536.

Since we spoke, there has been a change in the system design, and we have included a request to add a POD for the stockwater component of 74-15536 within the same ¼ ¼. It is approximately 30 feet downstream from the existing POD that will be used for irrigation on Little Sawmill. This is in lieu of the previous request for a new POD for stockwater in a separate ¼ ¼. Please see the Point of Diversion/Place of Use Supplement for details.

Please amend our application to include the revised information provided in the attachment for B.3. We corrected an error on the tablature to correspond with the POD shown on Attachment 7a for the irrigation component of 74-15536, and added the additional POD for the stockwater component of that same water right.

Please contact us and Abbie Gongloff at the contact information below if you have any questions.

Sincerely,

Andy Knight

RE: APPLICATIONS FOR TRANSFER OF WATER RIGHTS 74-1865, 74-15534 AND 74-15536. (82523)

Dear Applicant:

The Department of Water Resources (Department) received your application to transfer the above mentioned water rights from you on July 16, 2018. We also received the request to change the POU for the stockwater component of water right 74-15536 on August 6, 2018. The department is required to evaluate these applications in accordance with Idaho Code § 42-222. Initial review found that we need additional information for clarification of your applications. The following is a list of items that need to be addressed prior to further processing of these applications;

- The new point of diversion (POD) location for water right 74-15536 does not match the application map provided. Legal description tablature (attachment #B3) shows location as **Government Lot 4 NWNW of T18N, R24E, S33.** The application map (attachment #7a) shows this POD's location in **SWNW T18N, R24E, S33.** Please specify which location is correct for this application. Attachments included.

- Please include the point of diversion tablature location for the stockwater component of right 74-15536 on attachment #B 3 with a map of this point of diversion. (Please note that the diversion rate for the stockwater component of this right is not additional to the irrigation component of this right. Diversions from all of the points of diversion must not exceed the Total Diversion rate of 1.82 cfs).

The department will not be able to proceed with processing this application until we have received the requested information. Please provide the requested information within 30 days to allow the application to be processed.

If you have any questions on this matter, please contact me at (208) 287-4910.

Sincerely,

Clay Webster
Water Rights Supervisor

Re: Knight, 74-15534, 74-15536, and 74-1865 Water Right Transfer

The Upper Salmon Basin Watershed Program (USBWP) is assisting Andrew and Kathleen Knight in the attached application for the transfer of water rights 74-15534, 74-15536, and 74-1865 in order to implement a fish habitat restoration project on Little Sawmill Creek.

- Water rights 74-15534 and 74-15536 have a common point-of-use (POU) which completely overlaps, consisting of 60.8 acres with a diversion rate of 1.82 cfs and a priority date of 02/12/1875. However, the source for 74-15534 is only the Lemhi River. While 74-15536 is supplied by two sources, the first being an Unnamed stream (locally known as Little Sawmill Creek) in section 32 and an Unnamed stream (locally known as Indian Springs) in section 33. Both Unnamed streams combine on the Knight property and then flow the final 1,330 feet together into the Lemhi River. The current irrigation system diverts water into a bubbler screen and pipeline, 90 feet downstream from the confluence of the two streams.

- Water right number 74-1865 is a separate point-of-diversion (POD) and POU from the water rights listed above. This water right covers 4 acres with a diversion rate of 0.08 cfs and a 04/01/1956 priority date with the source listed as springs tributary to Little Sawmill Creek. A small diversion collects water into a portable mainline which is gravity fed to the POU.

The proposed project will combine water rights 74-15536, and 74-1865 into a shared gravity fed pipeline from the Unnamed stream (locally Little Sawmill) which is the existing POD (74-15536 in section 32).

Furthermore, the POD in section 33 for water rights 74-15536 will be moved downstream but continue to combine 74-15534 and 74-15536 through a fish screen and into a pipeline from Unnamed Spring (locally Indian Springs). Water availability from the Unnamed Stream (locally Little Sawmill) eventually dwindles at which point the irrigator begins to irrigate from the Unnamed Spring (locally Indian Springs). Only if conditions worsen significantly does the diversion at the Lemhi River, L-43C, get opened. The POU shape for water rights 74-15534 and 74-15536 will be modified to accommodate a new pivot sprinkler and handlines while retaining the original acreage of 60.8 total acres. The POU shape for water right 74-1865 will be modified to accommodate a pod irrigation system while retaining the original acreage of 4 total acres.

In summary, the POD for 74-15534 from the Lemhi River will remain the same with a modified POU. The POD for 74-15536, Unnamed stream (locally known as Little Sawmill Creek) in section 32 remains the same. However, it will share a common POD with water right 74-1865 but not POU acres. The POD for 74-1865 is moving upstream but will still be below the source springs. Though the source (springs trib. Little Sawmill) doesn't match 74-15536 (Unnamed stream) on the paperwork they are within the same drainage. A valve will be installed to isolate the 4 acre POU for 74-1865 from receiving any Lemhi water.

The new point-of-diversion for the gravity fed irrigation diversion will consist of a CMP inlet structure with a control gate, a bubbler screen and a flow meter. The gravity system has a design flow of 667 gpm (1.5 cfs). Irrigation water pertinent to water rights 74-15536 and 74-1865 will be diverted into a 08" pipeline and delivered to their modified respective places-of-use.

The new POD for 74-15536 and 74-15534 is below the confluence of Little Sawmill and Indian Springs. A point-of-diversion fish screen will divert the water into a pipeline which will go to a sump and a pump system to pressurize the sprinkler line. This system will be used when there is not enough flow to supply the gravity system. IDWR approved flow meters will be installed on both the gravity system and the pump system.

COPY

It should be noted that this water rights transfer hinges on a land swap between the Knights and the adjacent landowner, Guardian Limited Partnership (GLP). The land swap has been accomplished on warranty deeds attached to this application which specify the retention of the water rights of both parties. GLP has been advised to retain and relocate their water rights and are responsible for all associated work without further assistance.

Please contact me if you have any questions regarding the attached application.

Sincerely,
