Diversion Rate

Permitted Rate: 0.03 cfs

BU Standard Limit: 0.03 cfs

BU Fee Limit: 0.20 cfs

Theoretical (optional): cfs

Recommended Total Div Rate: 0.03 cfs**Annual Volume**

For Irrigation:

cfs x 1.9835 x days = NA af

acres x af/ac (FHR) = NA af

Smaller of two volumes = NA af

For other uses: Stockwater - Administrator's Memorandum #22 suggests a yearly volume limit of 1.4 AF and 0.03 cfs for 100 range cattle.

Permit 67-7763 authorizes the diversion rate of 0.03 cfs from a SPRINGS for the purpose of STOCKWATER use. Based on the small permitted diversion rate and POU, this qualifies for an in-office field exam as stated under IDAPA 37.03.02.035.01r. The exam was completed on June 7, 2018 by WRA Aaron Skinner after Wayne Cada returned a map identifying trough and spring locations.

System Description:

Water is diverted from springs to two rock forming troughs. The springs were developed in 11N01W Section 18 in the SENENW and SENWNE. As such, an amendment will be necessary to adjust the legal descriptions.

Conditions:

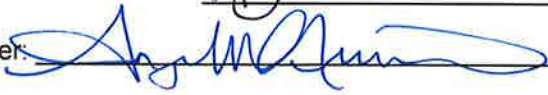

Condition 026 was removed and not forwarded to licensing.

RE: Water Permit 67-7763

Dear Mr. Cada:

On April 19, 2017, I sent you a letter requesting to schedule a field exam to verify development diverting 0.03 cfs of spring water, a tributary of SINKS for stockwater use. You responded to the letter by calling into the Western Office. After speaking with you over the phone, we concluded that an in-office exam is sufficient if you would provide the needed additional information. As such, I would like to request you to mark on the enclosed maps the location of the springs (two of them) and describe how you capture water from the springs and pipe them to the troughs.

Please submit the requested information for the permit to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The permit will become void without a timely written reply within the next thirty (30) days.

Please contact me at (208) 334-2190 if you need more information. Thank you for your attention to this matter.

Respectfully,

Aaron Skinner

RE: Scheduling Field Exam for Water Right Permit No. 67-7763

Dear Permit Holder:

We are planning to conduct water right examinations in the vicinity of the above-referenced permit **during the weeks of May 8th – May 26, 2017**. An examination is needed to verify the water use in order to issue a water right license.

The above-referenced permit authorizes **0.03 cfs of spring water, a tributary of SINKS for STOCKWATER use**. **If you have developed a beneficial use and still own the place of use property, please contact me at your earliest convenience to schedule an examination.**

If you did not develop a beneficial use of water under the permit during the beneficial use period, a license cannot be issued and the permit should be relinquished. If that use was developed, but have ceased using the water and you currently carry no interest in it, please relinquish the permit by submitting the enclosed Relinquishment of Permit form (no fee required).

If you did develop a beneficial use of water under the permit, but you no longer own the place of use property identified in the permit, please submit the enclosed Assignment of Permit form with the applicable \$25 processing fee.

Please contact me within the next thirty (30) days at (208) 334-2190 to either schedule an examination or submit a relinquishment or assignment form. If you no longer own the place of use property and/or do not respond to this letter, the department will work with the current property owner to issue a license or void the permit.

Sincerely,

Aaron Skinner
Water Resource Agent
