STATE OF IDAHO

Ident. No. 94-9620

RECEIVED

DEPARTMENT OF WATER RESOURCES

JUL 24 2018

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant(s) STATE OF IDAHO DEPT OF FISH AND GAME Phone 208-769-1414
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address 2885 W KATHLEEN AVE City COEUR D ALENE
 State ID ZIP 83815 Email DAVID.VANDERIET@IDFG.IDAHO.GOV
2. Name of representative, if any _____ Phone _____
 Mailing address _____ City _____
 State _____ ZIP _____ Email _____
- a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply blackrock gulch crk / bull run crk which is a tributary of COEUR D ALENE RIVER
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
48N	01W	7			NE	NE	KOOTENAI	BLACKROCK GULCH	
48N	01W	7			NE	NE	KOOTENAI	BULL RUN CREEK	

5. Water will be used for the following purposes:
- Amount 2092.4 AF for WILDLIFE STORAGE purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) _____ cubic feet per second (cfs) and/or (b) 2092.4 acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. 51 X 8 FOOT CONCRETE CONTROL STRUCTURE
- b. Height of storage dam 9 feet; active reservoir capacity 1630 acre-feet; total reservoir capacity 1630 acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No
- e. If well is already drilled, when? _____; drilling firm _____;
 well was drilled for (well owner) _____; Drilling Permit No. _____

For Department Use

Received by AF Date 7-24-18 Time _____ Preliminary check by _____
 Fee \$ _____ Received by _____ Receipt No. _____ Date _____

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total feet of head and proposed capacity in kW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; must complete and attach the Municipal Water Right Application Checklist.
 - Domestic; show number of households _____
 - Other; describe fully. _____
9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
				S	E	E		A	T	T	A	C	H	E	D				

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? _____
11. a. Who owns the property at the point of diversion? APPLICANTS
- b. Who owns the land to be irrigated or place of use? APPLICANT, ID DEPT PARKS REC, BUTOLPH, HAWKS, IDL
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: APPLICANT HAS AGREEMENT WITH PARTIES
12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. SEE ATTACHED
13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).
14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Idaho Department of Fish and Game Water Right Permit Black Rock Slough

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above:

The proposed request for a water right permit for Black Rock Slough is filed in conjunction with Idaho Department of Fish and Game (IDFG) management efforts to restore and improve wetland conditions for wildlife and recreational use in Black Rock Slough. Black Rock Slough is contaminated with heavy metals (principally lead) from historic mining activity upriver in the Coeur d'Alene Basin. The wetland is located within the boundary of the Coeur d'Alene River Wildlife Management Area (CDARWMA). The CDARWMA is managed by IDFG and consists of over 9,000 acres of wetland and terrestrial habitats. Part of IDFG's Wildlife Management Areas' mission is to maintain highly functional wildlife habitat and provide wildlife-based recreation. Currently, Black Rock Slough's hydrology is dependent on the water levels of the Coeur d'Alene River and the downstream management of the Post Falls Dam on the Spokane River. These hydrologic conditions limit recreational opportunities and wetland productivity. Black Rock Slough is an important wetland habitat for waterfowl, other wetlands species, and waterfowl hunters. Black Rock Slough will benefit from the ability to manage water levels gained through the instillation of three water control structures. The water control structures consist of a 51'-0"x8'-0' concrete structure with spillway and removable stop logs, a 5'-0"x 3'-3" Inline water level control structure with removable stop logs, and a whistle stop water control structure with removable stop logs to hold water in an adjacent pond.

The portion of Black Rock Slough that IDFG would like for wildlife water storage includes over 326 wetland acres and pond capacity of approximately 1630.0 AF. The IDFG is requesting 2,092.4 AF of water storage for the benefit of wildlife and recreational waterfowl hunting. The requested acre-feet will provide IDFG with the ability to manage water levels through drawdowns and wetland recharges. The water level management strategy of the IDFG is to hold 1000 AF of water in the spring to reduce waterfowl exposure to contaminated sediments during waterfowl migration, draw the water down in the summer to increase nutrient cycling, and recharge the wetland in the fall to improve waterfowl hunting. This management strategy will increase nutrient cycling, reduce waterfowl exposure to contaminated sediments, improve wetland vegetation, cultivate biodiversity, and improve water quality. Furthermore, the installation of water control structures in Black Rock Slough will prevent the input of additional contaminants from the Coeur d'Alene River.

Total Storage Calculations

FILE NUMBER	F & G APP
REVIEWER	Adam Frederick
DATE	7/24/2018

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total seepage, evaporation and fill capacity required for a pond.

User Input
Calculated value
Formula Explanations

Surface Area (AC.)	326	"Surface Area" is automatically carried over from the "Seepage Loss" sheet.
Average Pond Depth (FT.)	5	"Average Pond Depth" depicts the actual depth of the pond either measured or estimated. Note: If you know the maximum depth and not the average depth, the Field Examiner's Handbook suggests multiplying the maximum depth by 0.4 to get the average depth, or you can use any method that seems reasonable to attain average depth.
Pond Capacity (AF)	1630.0	Pond Capacity is calculated by multiplying the Pond Surface Area by the Average Pond Depth. If you know the capacity, divide the capacity by surface area and enter the average pond depth in the space above. Note: If pond capacity is determined using a method shown on the "Pond Capacity" sheet, the user may need to modify the value of "Pond Capacity" (cell B9) manually. Note that if the value is modified manually, the formula will be altered for future use.
Multiple Fill Volume Above Initial Fill to Fulfill From Storage Needs- "Multiple Fills" (AF)	0	The "Multiple Fill Volume Above Initial Fill" is the acre-feet of water required to meet a <i>from storage</i> component if the <i>from storage</i> component exceeds a one time fill. This section should not include the amount of water needed to fill the pond initially or the amount of water needed to maintain the pond level due to evaporation or seepage. For example: if a pond has a capacity of 5 acre feet and 2.5 acre feet of seepage and evaporation, but the pond is used for irrigation that requires 10 acre feet of from storage for the irrigation use, then you would insert 5 acre feet into this location (10 acre feet needed - 5 acre feet from the initial fill = 5 acre feet of additional storage needed). Note: You must have a "From Storage" component exceeding the initial fill on the permit to include a volume in this space.
Estimated Seepage Loss (AF)	0.0	The "Estimated Seepage Loss" is automatically carried over from the "Seepage Loss" sheet.
Estimated Evaporation Loss (AF)	462.4	The "Estimated Evaporation Loss" is automatically carried over from the "Evaporation Loss" sheet.
Total Volume Required (AF)	2092.4	The "Total Volume Required" is calculated by adding the Pond Capacity, Multiple Fills, Seepage Loss, and Evaporation Loss amounts to determine the total amount of storage required.

Application For Permit No. 94-9620

Dear Applicant(s):

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the COEUR D ALENE PRESS, IDAHO STATESMAN, LEWISTON TRIBUNE, POST REGISTER, TIMES NEWS on 9/6/2018 and 9/13/2018. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Tammy Alleman
Administrative Assistant

REVISED!!! Thank you for your help with this!

Please publish the enclosed legal notice in the Lewiston Tribune on the dates indicated September 6th and September 13th (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately. **Please send a proof once you have the article ready for print for our review.**

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before **9/24/2018**. Your cooperation is appreciated.

Thank you,

Tammy

Idaho Department of Water Resources
7600 N Mineral Dr. Ste 100
Coeur d'Alene, ID 83815-7763

Dear Idaho Department of Water Resources,

The Idaho Department of Parks and Recreation (IDPR) supports Idaho Department of Fish and Game's (IDFG) Mission to improve the habitat within the slough by managing the water level of Blackrock Slough, including those affected portions of IDPR parcels that are located within. The IDPR understands that water management will involve impounding or releasing water contrary to levels currently established in Blackrock Slough under current management by Avista. The IDFG will manage water levels by developing water control structures near the Trail of the Coeur d'Alenes.

With this letter IDPR would like to extend support for IDFG's management of the water levels over parcels 48N01W-07-0050, and 48N01W-00-0001 located within Black Rock Slough for the benefit of waterfowl and wetland habitat.

Sincerely,

A handwritten signature in blue ink, appearing to read "Kathleen Durfee".

Kathleen Durfee
Trail Manager

Idaho Department of Water Resources
7600 N Mineral Dr. Ste 100
Coeur d'Alene, ID 83815-7763

Dear Idaho Department of Water Resources,

It has been brought to the attention of the Idaho Department of Lands (IDL) that the Idaho Department of Fish and Game (IDFG) is applying for a water right to store water for the benefit of wildlife at Black Rock Slough. The real property that IDL manages consists of a 5 acre portion of parcel number 48N01W-08-4700 that is located within the slough. This portion of our property is continually inundated due to current water management by Avista at Post Falls Dam. The Idaho Department of Fish and Game has expressed its desire to manage water levels independently of Avista's water level management within the Slough. The objective of IDFG is to manage water levels to benefit wildlife and implement moist soil management to improve wetland habitat.

The IDL supports IDFG's Mission to improve the habitat within the slough and grants IDFG permission to manage the water level of Blackrock Slough and the portion of parcel 48N01W-08-4700 that is located within. The IDL understands that water management will involve impounding or releasing water contrary to levels currently established in Blackrock Slough under current management by Avista. The IDFG will manage water levels by developing water control structures near the existing bike path.

With this letter IDL would like to extend support and grant IDFG permission to manage the water levels over parcel 48N01W-07-8000 located within Black Rock Slough for the benefit of waterfowl and habitat located within Black Rock Slough.

Sincerely,

Eric Besaw
North Operations Chief

Subject: Request for Comments on WR# 94-9620
Attachments: 94-9620 Application For Permit.pdf

Dear Interested Agencies:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced water right applications. You can find copies of the applications attached to the email and also at: <http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>.

This office can publish notice of the applications as soon as the initial review is completed; therefore, your prompt response to this request is appreciated. If your agency desires to formally protest the approval of the application(s), you may do so after the notice is published by filing a written protest along with a \$25.00 filing fee within 10 days after final publication. The deadline for comments on the applications is September 24, 2018.

Please contact the Northern Region Office at (208) 772-2800 if you have any questions regarding the applications.

Thank you,

Tammy
