Looks good. Go ahead and do it. Thank you. Emil

Emil,

Attached is a revised map depicting a 40.8-acre place of use in purple. The water rights currently authorize 45.3 irrigated acres. 4.5 of these acres are located on the Cooper property. That leaves 40.8 acres available for transfer. As you can see, I tightened up the shapes for the northern fields, and carved out some of the acres on the bar that look dry in all of our aerial photos. Please confirm that the revised map is acceptable.
