RE: Service Area POU Shape Updates

On July 25, 2018, Nick Miller (Manager IDWR Western Region) received a request to update the City of Eagle service area boundary shapefile (letter in file). The request included an electronic shapefile received via email the same day.

The following summarizes my understanding of the request in relation to the water right records as well as the updates made:

- Right 63-12448 large POU was not linked to any other water right large POU. Linked 63-12448 large POU to right 63-11413 large POU.
- Once linked, I updated the large POU (POU ID 824568) and PLS table for rights 63-11413 and 63-12448 to the shapefile provided by the City of Eagle.
- Right 63-12017 is also referenced in the City of Eagle's July 25, 2018 request. However, this right is for Diversion to Storage, Aesthetic Storage, Aesthetic, Recreation Storage, Recreation, Wildlife Storage, and Wildlife uses. The nature of use of this right does not qualify for a service area/large POU. Therefore, I did not update the POU shapes for the right.
- Permit 63-32573 was not linked to any other water permit large POU. Linked 63-32573 large POU to permit 63-32089 and 63-33876 large POU.
- Once linked, I updated the large POU (POU ID 775318) and PLS table for permits 63-32089, 63-32573, and 63-33876 to the shapefile provided by the City of Eagle.
- Permit 63-32090 fire protection use POU cannot be linked to the same large POU (POU ID 775318), because of the nature of use. However, the fire protection POU is the service area per the permit issued. Therefore, I updated the POU shape and PLS to match the other permits' large POU.
- Application 63-33878 did not have an application or permit POU shape created. Created large POU (POU ID 813585) for the application and linked the draft permit POU shape to the large POU (POU ID 775318) for permits 63-32089, 63-32573, and 63-33876.
