

MEMORANDUM

TO: 65-3211B and 65-22928 File

FROM: Angie Grimm 

DATE: 8/10/2018

RE: Recreation Storage and Irrigation POU Shape Update

On July 31, 2018, Nick Miller (Manager IDWR Western Region) met with Dustin Fee during an office day visit. At that time, Dustin pointed out an apparent error in the place of use (POU) shapefiles right 65-3211B and permit 65-22928. I reviewed the backfile for both water right records. The following summarizes my understanding of the facts and findings:

- Dustin Fee is the landowner of parcel #RP17N03E152316 (as identified by 3/8/18 Valley County parcel information), which is the land upon which the current POU shapes for 65-3211B and 65-22928 reside. He is requesting we remove the shapes from his parcel and place them on the parcel to the north as that is the correct place of use per his knowledge and understanding (see attached 65-3211B Recreation Storage POU Shape as of 7/31/18, 65-3211B Irrigation POU Shape as of 7/31/18, and 65-22928 Recreation Storage POU Shape as of 7/31/18 showing POU shapes prior to this memo).
- Transfer no. 71687 application form included a warranty deed confirming the land the applicant owned correspondences to parcel # RP17N03E151925 (as identified by 3/8/18 Valley County parcel information). This land is directly north of the parcel on which the POU shape is currently depicted.
- The Claim File for 65-3211B depicts the original irrigation POU (prior to processing of transfer no. 71687) as being 30 acres corresponding to parcel # RP17N03E151925.
- Transfer no. 71687 did not change the place of use of right 65-3211B. It only changed the nature of use for a portion of the right to recreation storage and diversion to storage uses.
- Permit 65-22928 authorizes a recreation storage surface area of 10.5 acres. Recreation storage POU shapes for 65-3211B and 65-22928 are only ~2.3 acres currently.
- The requested change to POU shapefiles is within the same PLS currently authorized for the place of use. No transfer or permit amendment is required to update the shapefiles.

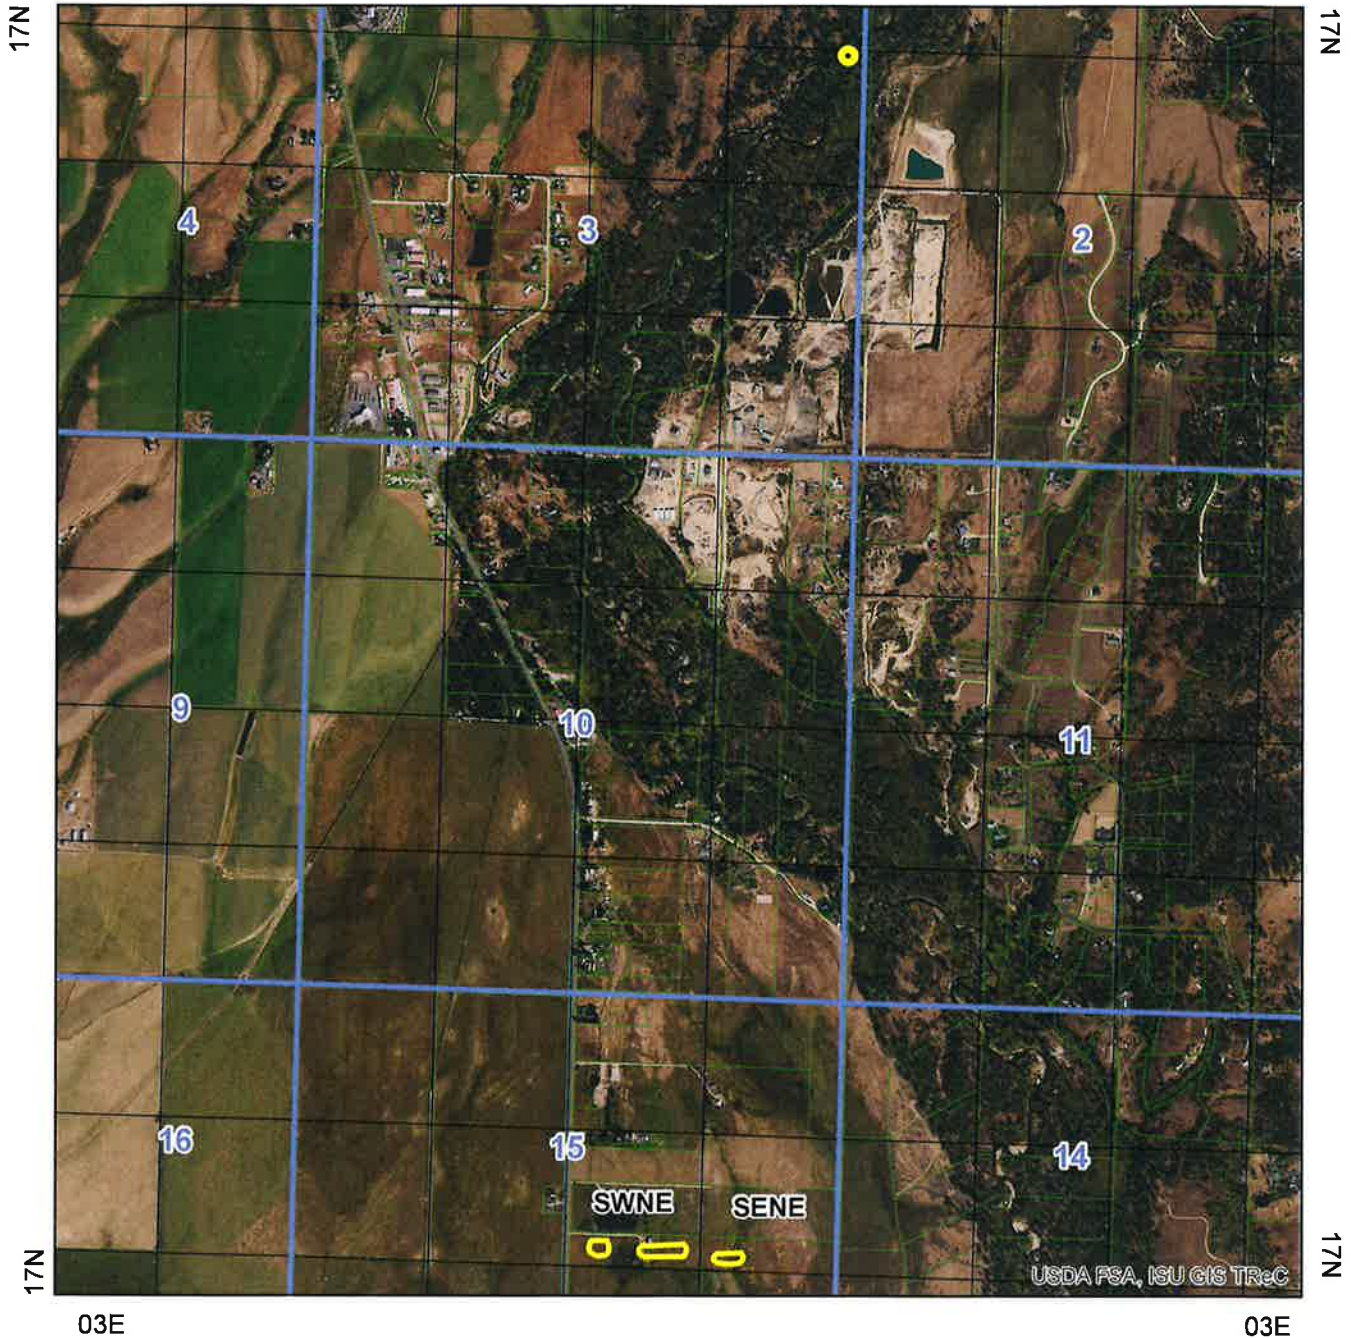

On August 9, 2018, I updated the Recreation Storage POU shapes for right 65-3211B and permit 65-22928. In addition, I updated irrigation POU shape for right 65-3211B. On August 10, 2018, the POD shapes for permit 65-22928 were also updated to depict centroids of the recreation storage ponds.
