RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This rental does not authorize construction of a well.
10. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this rental is located within State Water District No. 37.
11. This rental when combined with all other rights, shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-2619	irrigation	0.08	14.0	4.0		0.02	4.2	1.2
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.02	4.2	1.2
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. Memorandum

To: Water Rights 37-2619

From: Remington Buyer

Date: May 30, 2018

Re: Water Supply Bank Rental Application 1041

Purpose/Narrative: Rental application received February 22, 2018, for irrigation of 1.2 acres of a 2.4 acre residential parcel north of Ketchum. It appears that the residential home and driveway cover an area of approximately 0.7 acres, leaving 1.7 acres as irrigable, of which 0.5 acres is authorized under a permit-exempt, domestic ground water right, and the remaining balance of 1.2 acres is covered through this rental.

Authority to File: Application has been signed and submitted by Jeffrey and Judith Greenstein, the owners of the property where rental water will be used, through their legal representative, Jim Speck. No concerns about authority to file.

Water Right Validity/Forfeiture Evaluation: Water right 37-2619 is leased to the Water Supply Bank. No concerns about water right validity or forfeiture.

Injury Evaluation: Water right 37-2619 authorizes diversions of ground water from the Warm Springs drainage, which is west of the City of Ketchum and tributary to Big Wood River surface and ground water flows. The rental location is north of the City of Ketchum. The anticipated impact of this rental is to decrease ground water depletions in the Warm Springs drainage, and to increase ground water diversions north of Ketchum, but it is not anticipated that this rental will significantly change surface water flows in the Ketchum to Hailey reach of the Big Wood River. This rental appears permissible, subject to the right of prior appropriators to request that it be modified or cancelled upon a future showing of injury.

Enlargement of Use: Water right 37-2619 authorizes diversions at a per-acre rate and volume of 0.02 cfs/ac and 3.5 afa/ac, which is proportionate to what this rental is requesting. No enlargement should occur under this rental.

Local Public Interest: No information indicates this rental is contrary to any local public interests.

Beneficial Use/Conservation of Water Resources: The rental purpose (irrigation) is a beneficial use and irrigation rates appear to be consistent with water resource conservation standards.

Department/Watermaster Comments: Watermaster and regional comments will be requested.

Water Supply Bank Evaluation: It is recommended this rental be approved.
