RE: Water Right Permit No. 65-22349

Dear Permit Holder(s):

The Idaho Department of Water Resources (Department) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the location and extent of development that has been established in compliance with the terms of the permit.

During the field examination, it was found that the one of the wells was drilled in a different location than originally permitted. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when issued. Please review the document to ensure it accurately reflects your water use. As shown on the form, the points of diversion include two wells in the NESW quarter-quarter of Section 17 and one in the SENW, Section 17. **If you concur with the information presented, please sign and return the form(s) with the \$100.00 filing fee within 14 days.**

Also included with this letter is an Application for Permit and instructions. The original intent of water right permit 65-22349 was to develop 99 acre-feet annually of water. The dairy has since grown and at its current operation, an additional 33 acre-feet of water per year minimum is required. Diversion of the water in excess of your permitted amount could be subject to a notice of violation and possible fines per Idaho Code §42-1701B.

If you have any questions, please call me at 208-287-4912.

Sincerely,

Rachael Smith
Water Resource Agent, Sr.
