

MEMORANDUM

TO: Water Rights File 63-11119
FROM: Sandra Thiel
DATE: July 3, 2018
SUBJECT: Water Right License

On June 11, 1990, the Department issued permit 63-11119 with a proof due date of July 1, 1993. Permit holders Stanley and Isabel Samuelson submitted an extension of time to submit proof on May 17, 1993. The Samuelsons submitted proof within the time allotted for 10 acres of irrigation, in-house domestic use and 11 cows.

On September 25, 1996, a Department field examiner visited the site. According to the *Beneficial Use Field Report* the permit holders irrigated 7 acres of pasture with sprinklers. Two portable stock tanks provided water for 11 cows (number given on proof report). There is no mention of domestic use in the field report. The field examiner recommended a change from domestic to stockwater. An amendment is required to change the beneficial use from domestic to stockwater.
