Re: Transfer of Right No. 63-00276

Dear Mr. and Mrs. Stutheit:

Enclosed is a copy of the recommended portions of the above-referenced right regarding the transfer application filed by Mr. Schroder and in which you played a role. The recommendations resulted from the field examination conducted on 11/5/93.

Your portion of the right, to be known as 63-00276C, will provide .20 cfs for 10 acres immediately north of Hexon Road. These acres are identified as field no. 3 on the enclosed map. The amount of water for the ten acres is the full irrigation allotment allowed under Idaho law. The 5.2 acres in field no. 1 must be considered forfeited under the transfer process as required by Section 42-222, Idaho Code, due to non-use for more than five consecutive years.

As you can see, three owners have different portions of the right for different acres. Because Mrs. Crawford is not involved in the recent filing or in the recent sale of property, there is no need for me to send a letter to her. However, I did send a letter similar to this one to Mr. Schroder.

To irrigate more than the ten acres indicated in the transfer process, you would need to establish a new right from the river or slough. Please contact me by letter or telephone if you need to discuss this or any other water right issues.

Sincerely,

A handwritten signature in cursive script that reads "Steve Lester".

FROM: PAM SKAGGS/^{as}STATE OFFICE

SUBJECT: TRANSFER NO. 4215

DATE: January 13, 1994

=====

On 05-27-93, Gerald E. Schroder filed Application for Transfer No. 4215 which requested a change in place of use and correction of the point of diversion of all of Right No. 63-00276. Before processing was completed at the region, a portion of the property was sold to Ronald and Sharon Stutheit, splitting the transferred property and identifying a separate point of diversion for each parcel.

Due to the vagueness of the decree information, a field exam was conducted by the region to confirm the history and existing use of the right. The exam found that both Schroder and Stutheits own a portion of the right at reduced rates and acres. Also, that a portion of the right may have been lost through forfeiture. This question should be addressed in the SRBA. (See Steve Lester's memo of 11-29-93 for exam results.)

The transfer document has been prepared according to the field exam recommendations for Schroder and Stutheits. The portion identified as Crawforth is not part of this transfer and has not been included in the approval, except as part of the unchanged portion of the right. A summary of the split is as follows:

<u>WR NO.</u>	<u>OWNER</u>	<u>CFS/ACRES</u>	<u>ASSOCIATED ADJ NO.</u>
63-00276	Crawforth	1.60/(80)	A63-00276 (Schroder)

T63-00276C	Stutheit	0.20/10.0	(Part A63-00276)

TOTALS = 1.60/(80) 36.0 Acres Confirmed.

MEMORANDUM

TO: FILE
 FROM: STEVE LESTER *SL*
 DATE: NOVEMBER 29, 1993
 SUBJECT: RECOMMENDATIONS FOR T.4215, 63-00276

Mr. Schroder filed a transfer application to split a part of this right. The application seeks to codify an accomplished transfer per SRBA filing A63-00276 and to add a P/D for the new owners (Stutheit). Prior to the transfer application, another owner filed A63-00276B for five acres (Crawforth). To remain consistent with SRBA filings, the following suffixes are used: A for Schroder, B for Crawforth, and C for Stutheit (no claim filed separately for this part, C results from split in transfer).

A field exam was conducted on 11/5/93 (see attached findings) to document the extent of use within the last five years under this right. A summary of the field exam information follows.

<u>OWNER & PORTION</u>	<u>RATE</u>	<u>POINT OF DIV.</u>	<u>PLACE OF USE</u>
(B) Schroder 276A	.52 cfs	NWNENW/NENWNW S.17 ¹ (pump at river)	24.5 ac. SWSW S.8 1.5 ac. NWNW S.17
(A) Crawforth 276B	.08 cfs	NWSW S.8 (pump at unnamed slough ²)	4.0 ac. NWSW S.8
(C) Stutheit 276C	.20 cfs	NWSW S.8 (new pump to be used)	10.0 ac. NWSW S.8 ³
TOTAL	.80 cfs		40.0 ac.

Conveyance loss is not applicable in this case (pump and pipeline). The balance of the rate of flow in this right, 1.60 cfs decreed minus .80 cfs recommended equals .80 cfs, is considered lost through lack of beneficial use. The volume requirement of 4.5 afa/acre applies to the above recognized acres.

1. Single point on or near QQQ line - this is a clarification of legal rather than a change from pages 1, 3, 4 and 5 of application.
2. Locally known as Kallarney Slough per A63-00276B.
3. Note forfeiture of 5.2 acres in ASCS field #1 north of slough in NWSW S.8. This is due to presence of well established native trees, grasses and forbs and lack of delivery system for this field. Applicant could not provide additional data to document beneficial use of water in this field within last five years.

Re: Transfer of Right No. 63-00276

Dear Mr. Schroder:

Enclosed is a copy of the recommended portions of the above-referenced right regarding the transfer application that you filed. The recommendations resulted from the field examination conducted on 11/5/93.

Your portion of the right, to be known as 63-00276A, will provide .52 cfs for 26 acres south of Hexon Road, including the three acres between your home and the river. The amount of water for your acres is the full irrigation allotment allowed under Idaho law for these acres.

As you can see, three owners have different portions of the right for different acres. Because Mrs. Crawford is not involved in the recent filing or in the recent sale of property, there is no need for me to send a letter to her. However, I am sending a letter to the Stutheits in which their portion of the water right is defined.

Any of the parties is welcome to contact me if more information is needed. Thank you for your cooperation in completing the transfer process, and I hope we have the opportunity to work together again.

Sincerely,

A handwritten signature in cursive script that reads 'Steve Lester'.

RE: "NEW ACRES" IN EXAM (BETWEEN HOUSE & RIVER)

Remnants of old ditch found 11/5/93 exam.

1987 ASES photo shows natural vegetation there. (TREES/SHAUBS).

Owner said old ditch was used to irrigate grass for cattle in understory of this patch.

Given proximity of site to river, reasonable to expect sub-irrigation from ditch in this vicinity.

Given credibility of owner & above information, EXAMINER concludes that this site should be credited as land covered by 63-00276.

Add these acres to Schneider portion of this right.

p/d " " assumed 80 acres W¹/₂SW¹/₄ 5.8 to
80 acres W¹/₂SW¹/₄ 5.8 & NWNW 5.17.

Then - split ownership where each owner will have separate
p/d for separate acres. Proposed:

A = Schroder portion .90 cfs, 45 acres, p/d NENWNW 5.17
from river (no change in p/d).

B = Statheit portion .70 cfs, 35 acres, p/d on slough in
NENWSW 5.8.

NOTE 63-00276 in T.227 (p/d change to NENW 5.17, 1954)
resulted in 63-00276A ≡ all of right with new
p/d, no split etc. so 63-00276A should not have
been created. No 63-00276B etc found per d'base.

- Schroder claims 80 acres W $\frac{1}{2}$ SW $\frac{1}{4}$ 5.8 & NW $\frac{1}{4}$ SW 5.17 per 63-00276; all 1.6 cts claimed.
- Crawforth claims 5 acres NW $\frac{1}{4}$ SW 5.8 (the excluded portion described in warranty deed?) with separate pld in this tract somewhere along the slough. Claims ~10 cts of the 1.6 cts total claim 63-00276B.
- no other AJ claims found for 63-00276 (no A, C, D, etc.).
- Crawforth was owner of right decreed to O'Donnel (63-00276) per T. 227 documentation.
(Note that 1954 map showed < 80 ac. lying in W $\frac{1}{2}$ SW $\frac{1}{4}$ 5.8).

Question -

If Crawforth owned all of 63-00276 & legitimately retained ~5 acres, did Schroder buy ~75 ac. of right? If so, then Schroder has 75/80 or 1.5 cts prior to any forfeiture.

Re: Application for Transfer of Right No. 63-00276

Dear Mr. Lester:

This is in response to your letter of July 14, 1993 regarding our revised transfer application.

Following are references to items that you mentioned or requested.

1. Taxpayers Notices for 1993 will provide proof of ownership for parcels of 40 A & 2.69 A. (I am unable to provide any reference of proof for the 2 A indicated as 5 N 5 W 8 NW $\frac{1}{4}$?)

Copy of Warranty Deed will provide ownership proof for the 35 A parcel.

2. Signed and notarized Change of Water Right Ownership form.
3. New Property owner Notice of Change of Water Right Ownership.

I have not yet received an approval statement from the Stutheits. In the sake of time, I will follow with a verbal request that they submit this item directly to your office.

4. Dated ASCS map to substantiate my attestation to the irrigation of said land.

I trust that this information and material will allow your office to proceed with the advertising and other steps to complete the requested transfer.

Please let me know if there is further need that

Re: Application for Transfer of Right No. 63-00276

Dear Mr. Schroder:

Enclosed is a revised transfer application for the above-referenced water right based on the recent sale of 35 acres to Mr. Stutheit. The current version of the transfer will accomplish the following points:

- 1) Split the right into two parts based on the number of irrigated acres and prorata water shares for the acres; and
- 2) Establish a separate point of diversion for each owner; and
- 3) Codify the accomplished transfer (change) of the water right that occurred prior to November 1987 whereby the existing diversion point is in NENWNW Sec. 17 (instead of NENW) and irrigated acres are in W 1/2 of SW 1/4 Sec. 8 and NWNW Sec. 17 (instead of just in Sec. 8 as decreed).

Please review the application form and sign it on page 8 (notarized signature) if everything looks correct. The following information should be submitted to me with the completed application.

- 1) Proof of ownership of all the acres listed on page 1 - copies of tax notices or warranty deeds etc. will be useful. This will show which acres are owned by you and which are owned by Mr. Stutheit. Label this as Attachment A.
- 2) Related to the above information, complete the enclosed Notice of Change of Water Right Ownership form. The ownership documents from the previous item can be used to show your and Mr. Stutheit's ownerships.
- 3) Mr. Stutheit should provide you with a letter indicating his approval of this transfer.
- 4) Verification that the 80 acres shown on page 1 have been irrigated within the past five years - the local ASCS office should be able to provide you with a copy of an aerial photo showing if the land has been irrigated or not. Be sure to have ASCS staff indicate the date that the photo was taken (should be after Nov. 1987). Label this as Attachment E.

Re: Application for Transfer of Right No. 63-00276

Dear Mr. Schroder:

Before this office can proceed with advertising your recent transfer application to add a point of diversion of the above-referenced right, some clarification is needed. Please review the following information and make any necessary changes on the enclosed revised application. The revised filing, when acceptable to you, should be signed and returned to me. This office can notarize the new application based on your signature on the original form (which is Attachment D).

1) The decreed right (63-00276) lists an unspecified number of irrigated acres in W 1/2 SW 1/4 Sec. 8 with a diversion point in NENW Sec. 17 (see page 3 for right as decreed).

2) The adjudication claim (A63-00276) lists 80 acres in Sec. 8 and Sec. 17 with a diversion point in NENWNW Sec. 17 (see page 5 for claim). I assume that claim information on page 5 defines how the right has been used prior to the start of the current adjudication on 11/19/1987 and, if so, the claim records an accomplished change when compared to the decreed right.

3) You wish to add a diversion point from a side channel or slough to prepare for a possible land sale, but the property has not been split yet. *

4) In filing for no. 3 above, you can formally record the accomplished change of the decreed right as listed by the adjudication claim.

If the above points are correct, the revised application that I prepared will take care of these details for you. Besides your signature on page 8, the following information is needed.

5) Proof of ownership of all the acres listed on page 5 - copies of tax notices or warranty deeds will be useful. Label this as Attachment A.

Mr. Arnold C. Crawforth
Route 1
Parma, Idaho

Dear Mr. Crawforth:

Relative to the change of point of diversion of your decreed water right from Boise River.

We are enclosing affidavit for change of point of diversion made out in detail according to the records of this Department.

Kindly sign before a Notary Public and return to this Department, and then upon receipt of same we will attend to the publication notice which will have to be published in a county newspaper for two consecutive weekly issues.

Very truly yours,
